COURSE DESCRIPTION

AMS 110 is an interdisciplinary introduction to the interplay between individual and group identities in American society between World War II and today. Given the influence of difference and power in American culture, we will consider the profound impact of the diversity of the American peoples on society and address differential power structures in American life and social relations. Our analysis of ethnicity, race, religion, gender, sexuality, region, class, and age will reveal the degree to which our identities are socially constructed. We will also focus on how identities constitute lived realities and shared communities as well as how prejudice and institutional discrimination shape certain individual's and groups' life chances and impact their access to resources, rights, and privileges. We will attempt to understand American identities through visual culture, memoir, fiction, ethnography, music, television, and film. Throughout the term, we will pay special attention to how issues of popular representation and histories of social movements for individual and group rights intersect with identity formation.

COURSE GOALS

- ✓ Learn how to think like an American Studies scholar
- ✓ Create a classroom community that fosters intellectual growth based on respect and civility
- ✓ Develop critical speaking, viewing, reading, thinking, note-taking, and library research skills that are applicable to life both within and outside of the university
- ✓ Question "common sense" or "dominant" understandings of gender, sexuality, ethnicity, religion, class, and popular culture

Another popular platform for American Identities books and manuals is Open Library. Additionally, many universities and educational institutions have their own digital libraries that provide free

access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
