Doric Temple:

The Making of the Doric Temple Gabriel Zuchtriegel, 2023-04-20 The author argues that Doric architecture originated in a disruptive shift in urbanism land use and colonization in Archaic Greece *The Doric Temple* Elisabeth Ayrton, 1961

The Making of the Doric Temple Gabriel Zuchtriegel, 2023 In this volume Gabriel Zuchtriegel revisits the idea of Doric architecture as the paradigm of architectural and artistic evolutionism Bringing together old and new archaeological data some for the first time he posits that Doric architecture has little to do with a wood to stone evolution Rather he argues it originated in tandem with a disruptive shift in urbanism land use and colonization in Archaic Greece Zuchtriegel presents momentous architectural change as part of a broader transformation that involved religion politics economics and philosophy As Greek elites colonized explored and mapped the Mediterranean they sought a new home for the gods in the changing landscapes of the sixth century BC Greek world Doric architecture provided an answer to this challenge as becomes evident from parallel developments in architecture art land division urban planning athletics warfare and cosmology Building on recent developments in geography gender and postcolonial studies this volume offers a radically new interpretation of architecture and society in Archaic Greece *The Optical Corrections of the Doric Temple* Tapio Prokkola, 2011-07-15 The optical corrections of the Doric temple were first mentioned by the Roman architect and writer Vitruvius According to him they were meant to prevent optical distortions that otherwise would make the temple look faulty This explanation has ever since been repeated by most scholars although some of them maintain that the corrections were actually implemented to bring vitality to the otherwise too static appearance of the temple Yet it is obvious that these distortions didn't bother later architects either during the Roman age or the Renaissance The author is both an architect and a historian of ideas This book represents an entirely new theory about the meaning of the corrections Prokkola claims that the corrections were simply tools used by the architects designing these temples to make the temple a unity although it was composed of many Doric columns in a word a unity in plurality He shows that the task of creating a unity out of a row of these round fluted and tapering columns with entasis would be difficult enough for any architect of any time The ideal of unity in plurality based on the heroic outlook inherited from the heroic past became the most fundamental ideal for the Dorian Greeks living in city states along with the development of the polis All the most important spheres of life were organized according to this ideal the polis itself its military organization the hoplite phalanx and finally the Doric temple that was the ultimate symbol of the city state This ideal as such is well known in the history of ideas but it is usually connected to Neo Platonism and early Christianity seldom to the archaic and classical Greeks However the analysis of some texts of the Platonic philosophers presented in this book shows clearly that these ideals were in fact very essential in their thinking During the archaic age many different often contrary approaches were attempted to solve the contradiction between unity and plurality Some temples were built using very heavy constructions emphasizing thus the aspect of unity to the extreme while some others

were more open and pavilion like emphasizing thus the ideal of plurality until finally in the classical era the final synthesis was found in classical temples precisely with the help of the optical corrections This new theory is able to explain many questions about Doric temples that have hitherto remained obscure Examples are the spatial nature of the temple precinct the meaning of the columns the meaning of the optical corrections the truth about the so called Doric corner conflict the reason for the tapering and entasis of the Doric column the meaning of the Doric flutings the lack of base under the Doric column as well as the nature of the Doric capital etc Prokkoala shows further that the interpretation of Vitruvius was based on a misinterpretation of the words of Ictinus the designer of the Parthenon because of different ideals between Classical Greece and the Early Roman Empire

Greek Doric Temples Gene Waddell,2018-12-23 This book is about how Greek Doric temples were designed Until dimensions can be predicted a design process has not been explained My approach to account for the proportions used to create Greek Doric temples has been to consider what architects needed to know at each point in the design process and how they could have known it I tried to consider every conceivable proportional relationship for all major elements of the 43 Doric temples for which sufficiently complete measurements are available As I made comparisons patterns began to emerge and eventually I found that a small number of procedures could generate the actual measurements for the great majority of temples The most important procedure was to use the column number ratio for the krepis crepidoma Nearly three fourths of all temples considered have the same ratio for column numbers and krepis dimensions The second most important procedure was to plan a regular frieze with triglyphs and metopes relating to one another as 1 1 5 2 3 and consequently triglyphs relate to interaxials as 1 5 This enabled the exact positions for columns to be marked on the stylobate and for the regular frieze to later align with column centers

Studies in Hellenistic Architecture Frederick E. Winter, Janos Fedak, 2006-01-01 Studies in Hellenistic Architecture is a detailed analysis of the development of the major building types of the Hellenistic age the mid fourth century B C to the time of the Roman conquest of the Eastern Mediterranean In this meticulous work Frederick E Winter reveals how the architects of the period went beyond anything achieved by their Classical Greek predecessors and how these impressive skills prepared the way for many of Rome's later architectural achievements Geographically the monuments included in this volume extend from Spain to Afghanistan and from Provence to North Africa Winter discusses the architectural achievements of the various regional styles of the Eastern Mediterranean and takes a detailed look at Hellenistic developments west of the Adriatic While the interrelationship of these regional developments is often unclear especially in cases where there are no explicit criteria for dating Winter makes excellent use of the advance in scholarship over the past fifty to sixty years offering the first real attempt at a synthesis of this vast subject Studies in Hellenistic Architecture is an invaluable resource containing a wealth of illustrations of the various types of Hellenistic building and the most comprehensive scholarship to date on the topic
