Downsizing in America William J. Baumol, Alan S. Blinder, Edward N. Wolff, 2003-06-26 In the 1980s and early 1990s a substantial number of U S companies announced major restructuring and downsizing But we don't know exactly what changes in the U S and global economy triggered this phenomenon Little research has been done on the underlying causes of downsizing Did companies actually reduce the size of their workforces or did they simply change the composition of their workforces by firing some kinds of workers and hiring others *Downsizing in America* one of the most comprehensive analyses of the subject to date confronts all these questions exploring three main issues the extent to which firms actually downsized the factors that triggered changes in firm size and the consequences of downsizing The authors show that much of the conventional wisdom regarding the state of downsizing in the 1980s and 1990s is inaccurate Nearly half of the large firms that announced major layoffs subsequently increased their workforce by more than 10 percent within two or three years The only arena in which downsizing predominated appears to be the manufacturing sector less than 20 percent of the U S workforce *Downsizing in America* offers a range of compelling hypotheses to account for adoption of downsizing as an accepted business practice In the short run many companies experiencing difficulties due to decreased sales cash flow problems or declining securities prices reduced their workforces temporarily expanding them again when business conditions improved The most significant trigger leading to long term downsizing was the rapid change in technology Companies rid themselves of their least skilled workers and subsequently hired employees who were better prepared to work with new technology which in some sectors reduced the size of firm at which production is most efficient Baumol Blinder and Wolff also reveal what they call the dirty little secret of downsizing it is profitable in part because it holds down wages *Downsizing in America* shows that reducing employee rolls increased profits since downsizing firms spent less money on wages relative to output but it did not increase productivity Nor did unions impede downsizing The authors show that unionized industries were actually more likely to downsize in order to eliminate expensive union labor In sum downsizing transferred income from labor to capital from workers to owners

Upsizing The Individual In The Downsized Organization Robert Johansen, Rob Swigart, 1994-10-20 Upsizing the Individual in the Downsized Organization shows us how to make the most of the new technology available but always within the context of the organization's human assets. It teaches us how to leverage social diversity in a global marketplace, how to redefine workflow and workspace, and corporate education, and even such fundamental concepts as loyalty, time, and quality. With economies of scale giving way to economies of structure, this book demonstrates the central importance of teams, how to maximize team performance, how to rethink motivation and rewards, and how to restore continuity and organizational memory.
