

How Carlini's form only
 seem to move
 you and show
 1971 in 1971 1971 in 1971
 1971 in 1971

In the drawing Carlini shows you how to see the figure in terms of simple forms. He used blocks to study the torso and neck planes and the hip and knee planes. He has shown a light from the left and from above. Thus, if we were to put the figure on the side and from above, if he had drawn perfectly like the figure and put the same light and shade on them, they would have looked very odd.

Even if you look like the figure, Carlini will show his movement of drawing. The line 141 suggests the top of the torso.

There is another principle every student here. As the artist moves his attention from one block to the next to another, he notes the direction of each form. In other words, reference lines are in drawing, such as such.
