**Space Fostering African Societies** Annette Froehlich,2021-02-22 This peer reviewed book provides detailed insights into how space and its applications are and can be used to support the development of the full range and diversity of African societies as encapsulated in the African Union s Agenda 2063 Following on from Part 1 which was highly acclaimed by the space community it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa but covers an

even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that while there have been significant achievements in recent years in terms of economic and social development which have lifted many of Africa's people out of poverty, there is still a great deal that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve. To this end, space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in helping Africa achieve its developmental aspirations, the book will appeal to both students and professionals in fields such as space studies, international relations, governance, and social and rural development.
