**Double Crossing** Richard Platt, 2013-07 It s 1906 and David O Connor newly orphaned and alone in the world has had to leave his home in Ireland to go and live with his uncle and aunt in America His journey to New York and his new life there are tougher than David could ever have imagined especially when he is harbouring a dark secret which he must take with him to his grave **Double crossing (large print).** Meg Mims, 2011 Annual Report New Jersey. Covers the latest developments usually missed in textbooks and monographs The broad range of modern genetics of cell and molecular biology biometry etc are included without glossing over the classical foundations The hundreds of simple and clear illustrations are very useful for classroom purposes because they can be drawn on the blackboard or projected on a screen without taking much time to make the crucial points The cross references among the entries tie the contents into an extremely useful comprehensive textbook The concise style leads the reader to the point without verbiage The etymology of the terms is explained The text is not intimidating and it is very easy to read because all the terms are explained within the book Most of the biometrical procedures are presented by worked out examples in a plain form rarely or not found at all in other books It effectively reaches out to non geneticists without compromising high scientific standards Usually the most essential features of a concept are presented at the beginning of the entry and the reader can go as far as she he feels needed about the logic The WEB and e mail addresses of databases and other sources of detailed information are very helpful A well selected list of about 1000 references published mainly in the last couple of years completes the volume The moderate price makes it a best buy and an excellent choice to own for students teachers scientists physicians lawyers and all educated persons who cannot afford an entire library yet wish to be well informed General Cytology Edmund Vincent,2024-05-31 This volume was at the time of publication the largest and most comprehensive book on the subject of cytology a branch of zoology which had grown considerably in the years before 1924 It was written by the foremost cytologists in the United States including Robert Chambers Edwin G Conklin Edmund V Cowdry Merle H Jacobs Ernest E Just Margaret R Lewis Warren H Lewis Frank R Lillie Ralph S Lillie Clarence E McClung Albert P Mathews Thomas H Morgan and Edmund B Wilson Annual Report of the State Board of Assessors of the State of New Jersey New Jersey.
