Special Education grade 2 University of Cologne language English abstract In this paper I will reference a total of three books a newspaper article and several conversations with the patient B and his parents I have chosen the topic of opportunities for development as the focus of my work because it seems the most important This paper is a short survey of Down syndrome and will only briefly examine the various aspects thereof The remarks about B should illustrate that people with Down syndrome also are capable of achievement in their lives This should be self evident and normal but unfortunately in our society today it remains somewhat unique and of an anomaly Cognitive and Behavioral Abnormalities of Pediatric Diseases Ruth Nass, MD, Yitzchak Frank, MD, 2010-04-12 This book provides a detailed account of intellectual other neuropsychological and behavioral manifestations of general pediatric diseases The conditions discussed include the whole range of pediatric diseases genetic syndromes other congenital conditions metabolic endocrine gastrointestinal infectious immunologic toxic trauma and neoplastic as well as sensory disabilities including deafness and blindness Although the book is not intended to discuss cognitive and behavioral manifestations of conditions usually considered to be primary neurological disease some of those including cerebral palsy muscular dystrophy myotonic dystrophy and epilepsy are included Where possible a translational approach is used linking the behavioral and cognitive manifestations of these conditions to the underlying structural chemical or genetic abnormalities and their effect on the brain and in turn on behavior and cognition At the same time included are significant psychosocial factors Together those factors have a major effect on patients performance including school performance and on their families This book is unique in its extensive coverage of the major pediatric conditions and of the detailed neurological neuropsychological and behavioral aspects of each condition
