## Draft Environmental Impact Statement

The Draft Environmental Impact Statement for the Great Northern Transmission Line Project is now available for public review. Please see the [Public Notice](#) for information on public document viewing locations, upcoming public meetings, and how to submit your comments on the DEIS.

This joint federal/state EIS analyzes the environmental impacts of the proposed Project, a range of reasonable action alternatives, and the No Action alternative. The EIS is organized into the following 11 chapters, followed by appendices.

[Table of Contents, Cover Sheet, Abstract, Summary \(.PDF, 5.7 MB\)](#)

[Summary \(.PDF, 6.0 MB\)](#)

**Chapter 1 – Regulatory Framework (PDF, 2.5 MB):** Describes the regulatory framework associated with the proposed Project, including the purpose and need for agency action, major federal permits (including the U.S. DOE Presidential permit), federal consultation requirements, state permitting requirements (including the MN PUC Route Permit), other state and local permits, and a summary of agencies, tribes, and persons consulted.

**Chapter 2 – Proposed Project (PDF, 2.8 MB):** Describes the project as proposed by the Applicant including proposed routes, structures, objectives, route selection process, estimated costs, and proposed schedule. Chapter 2 also describes the Applicant's engineering, design, and construction plans, land acquisition processes, and Applicant proposed measures to avoid and minimize environmental impacts.

**Chapter 3 – No Action Alternative (PDF, 1.2 MB):** Describes the "No Action alternative," in which the DOE would not issue a Presidential permit and the proposed Project would not be built. The analysis of the No Action alternative summarizes the impacts of not constructing the project and provides a baseline for analyzing and comparing potential environmental impacts from DOE's proposed action and alternatives.

**Chapter 4 – Route and Alignment Alternatives Proposed during Scoping (PDF, 19 MB):** Describes the four border crossing alternatives, 22 route variations, and nine alignment modifications that were proposed by agencies and the public during scoping. Chapter 4 also summarizes the process used by DOE in coordination with the DOC-EERA to jointly determine which border crossings and routes to include in the scope of this EIS. Chapter 4 also describes how the selected routes, route variations, and alignments are analyzed by dividing the 220-mile long project area into the three major sections: the West Section, the Central Section, and the East Section.
