Dragonstrike The Millennium War:

Dragon Strike Humphrey Hawksley, Simon Holberton, 1997-06-01 This is an authentically authoritatively constructed account in which the U S Asia Europe become dramatically unavoidably enmeshed in a war which erupts between Russia Vietnam on February 18 2001 It has the page turning quality of best selling fiction yet the events here make up a real life scenario which horrifies Western defense planners The authors both top correspondents in Asia have drawn much of the information about China s long term intentions from published material in China They have been lauded by military experts for the vivid authoritative descriptions of warfare weapons technology

War, Science, and Terrorism Jacques Richardson, 2002 Describes the application of research to the evolution of weapons It shows how natural engineering information and environmental sciences are exploited how even social science is applied to recruitment battlefield and logistical management and careful preparation of terroristic acts

Dragon Fire Humphrey Hawksley, 2011-12-12 At 0500 on Tuesday 3 May 2005 a lone Antonov 32 transport flies through the dawn light over the Himalayas and approaches the Tibetan capital Lhasa Its destination is the notorious Drapchi Prison where some of the most revered Tibetan leaders are being held The aircraft s loading bay is lowered The sky is filled with mushroom grey parachutes In a few minutes troops of the People s Republic of China are fighting invaders Far to the West Pakistani FCI multi role combat aircraft roar across the Line of Control and pound the strategic outpost of Kargil Heliborne troops follow to raise the national green crescent flag on Indian territory Suddenly the three sided war so dreaded in Asia India versus China and Pakistan is happening Nuclear arsenals are being readied in all three countries *Dragon Fire* is a totally gripping thriller with a horrifying and wholly believable conclusion Humphrey Hawksley s tense prose bristles with knowledge and insight into the most explosive political area in the world But what makes it all the more terrifying is that it s all based on fact takes the thriller in an important new direction

Discourse as Cultural Struggle Shi-xu, 2006-11-01 *Discourse as Cultural Struggle* challenges the cultural imbalance in current research traditions and argues for a culturalist perspective in facilitating better intercultural exchange amidst accelerated processes of globalization It is the first engagement with discourses in non mainstream cultures Covering a wide range of issues in public professional media and intercultural communication the twelve original essays here tackle culturally pressing issues by aligning viewpoints from various geopolitical contexts This is a thought provoking book for scholars and researchers of language and communication studies who seek innovative approaches in their fields of interest Here is a book that takes diversity seriously and lifts it to the level of an epistemic paradigm What we know is culturally constituted and discursively articulated this relativism is converted into an absolutism due to historical power relations and we find ourselves a curious situation in which anything that suggests diversity at fundamental levels of thought becomes a serious theoretical problem This book addresses this absurdity and in the context of globalization the exercise is to be welcomed Jan Blommaert University of London This volume opens up new and innovative

perspectives for all interested in discourse analysis cross cultural communication and social change It links and relates approaches which originate more in the West with those stemming from the East Thus a challenging debate is finally made possible which ultimately could and should lead to more collaborative research and even more importantly to better and mutual understanding Ruth Wodak Lancaster University This fine volume enters the large field of Discourse Studies by insisting that cultural knowledge of discourses is essential and thus necessary for our understanding of how discourse shapes human communities and relations among them It is a rich collection of conceptual and case studies a fine addition to our literatures and worthy of our careful study Donal Carbaugh University of Massachusetts at Amherst *Contingent States* William A. Callahan,2004 In the 1990s Greater China became the subject of debate as the site of either the danger of the China threat or the promise of Confucian capitalism William A Callahan argues that Greater China presents challenges not only to economic and political order but also to international relations theory In fact Greater China though absent from geopolitical maps and international law is very much present in economic and cultural exchange and exemplifies the contingent state of international politics Callahan deconstructs the mainstream geopolitical and political economic understandings of Greater China tracing its emergence through an ethnographic analysis of four political problems in East Asia the South China Sea disputes Sino Korean relations the return of Hong Kong and cross straits relations Callahan shows how bureaucrats outlaws tycoons academics workers politicians and hooligans alike produce Greater China through networks of relations in local national regional global and transnational space Finally *Contingent States* reveals how each of the problems provoked theoretical innovations that depart from standard conceptions of sovereignty democracy and the nation state William A Callahan is senior lecturer of international politics and deputy director of the Center for Contemporary Chinese Studies at the University of Durham England and the author of *Imagining Democracy Reading The Events of May in Thailand and Pollwatching Elections and Civil Society in Southeast Asia* *Nuclear India in the Twenty-First Century* D. SarDesai,R. Thomas,2002-05-02 This collection of essays unlike other books on this subject emphasizes strategic technological and economic factors It includes contributions from a combination of academics and governmental experts from both the United States and India *Nuclear India in the Twenty First Century* provides an important picture of India s nuclear intentions and capabilities and should facilitate policies that the US may consider in response to regional and global proliferation **The South China Sea Disputes** Nalanda Roy,2016-12-02 The South China Sea has long been regarded as one of the most complex and challenging ocean related maritime disputes in East Asia Recently it has become the locus of disputes that have the potential of escalating into serious international conflicts Historical mistrust enduring territorial disputes and competing maritime claims have combined to weaken an at least partially successful regional security structure Issues of concern include territorial sovereignty disputed claims to islands rocks and reefs jurisdiction over territorial waters exclusive economic zones and the seabed regional and international rights to use the seas for military purposes maritime

security rapid economic development and environmental degradation The fear is that increasing competition for energy and other resources will exacerbate conflicts and further fuel nationalism and sovereignty issues in the region The SCS has an integrated ecosystem and is one of the richest seas in the world in terms of marine flora and fauna coral reefs mangroves sea grass beds fish and plants National economic security can be easily affected by conflicts occurring in major international trade routes like the SCS or how such an unclear situation might even give rise to environmental challenges in the future The book creates an understanding as to why this region is important not only to the claimants but to global powers like the United States and India The book examines current and potential conflicts in the South China Sea and also evaluates how conflicts have been managed to date and suggests as to how they might be better managed in the future This book concludes with recommendations for improving the situation in the region by ensuring a strong economic relationships using high resolution observation satellites and undertaking joint development and resource exploration etc
