Dread Disease:

The Dread Disease James T. PATTERSON, James T Patterson, 2009-06-30 Cancer is that loathsome beast which seized upon the breast drove its long claws into the surrounding tissues derived its sustenance by sucking out the juices of its victims and never even relaxed its hold in death a turn of the century physician recorded Even today cancer affects the popular imagination with dread In a subtle and penetrating cultural history James Patterson examines reactions to the disease through a century of American life The modern American preoccupation with cancer was apparent during the widely publicized illness and death from that ailment of Ulysses S Grant in 1885 Awareness of the disease soon figured heavily in the public consciousness and individual reactions to it continue to reveal broader tensions within American society Patterson examines responses to cancer by researchers and physicians quacks and faith healers by the multitude who have heard sensational media reports of cures as well as by many who have had firsthand experiences with the disease Optimistic attitudes of many experts contrast sharply with the skepticism of large segments of the population often the less wealthy and the less educated that reject the claims of medical science and resist the advice or some argue the paternalistic dictates of the government supported cancer research establishment Expanding expectations of a cure from a confident medical profession the rise of a government supported Cancer Establishment managing a large research empire the emergence of a cancer counterculture a new emphasis on prevention through control of the environment and the self and the private fears and pessimism of millions of Americans form a telling history of American social patterns Whether the issue is smoking pollution or regular checkups attitudes toward cancer reflect more general views on medicine public policy and illness as well as on death and dying This century has witnessed both a biomedical revolution and a vastly increased role of the state in the private lives of citizens but not everyone has bought the medical package and many have little faith in government intervention Readers interested in the cultural dimensions of science and medicine as well as historians sociologists and political scientists will be enlightened and challenged by *The Dread Disease* [The Works of Charles Dickens](#) Charles Dickens, 1897 *Cases in Marketing Financial Services* Christine Ennew, Trevor Watkins, Mike Wright, 2014-05-15 *Cases in Marketing Financial Services* presents several cases from different countries relating to the marketing of financial service The book tackles both strategic and tactical marketing issues and then covers a wide range of institutions and markets The text will be of great use to professionals in the financial service industry **An Ungovernable Foe** Natalie B. Aviles, 2024-01-23 Winner 2024 Choice Outstanding Academic Title In American politics medical innovation is often considered the domain of the private sector Yet some of the most significant scientific and health breakthroughs of the past century have emerged from government research institutes The U S National Cancer Institute NCI is tasked with both understanding and eradicating cancer and its researchers have developed a surprising expertise in virus research and vaccine development *An Ungovernable Foe* examines seventy years of federally funded scientific breakthroughs in the

laboratories of the NCI to shed new light on how bureaucratic organizations nurture innovation Natalie B Aviles analyzes research and policy efforts around the search for a viral cause of leukemia in the 1960s the discovery of HIV and the development of AIDS drugs in the 1980s and the invention of the HPV vaccine in the 1990s She argues that the NCI transformed generations of researchers into innovative public servants who have learned to balance their scientific and bureaucratic missions These scientist bureaucrats are simultaneously committed to conducting cutting edge research and stewarding the nation s investment in cancer research and as a result they have developed an unparalleled expertise Aviles demonstrates how the interplay of science politics and administration shaped the NCI into a mission oriented agency that enabled significant breakthroughs in cancer research and in the process she shows how organizational cultures indelibly stamp scientific work
