safeguards in place from regulators around the world and asks whether these are sufficient The question of labelling held by some to be an obvious way out for concerned consumers is examined and the honesty and usefulness of some of these labels addressed The book then looks at issues of real concern particularly environmental issues and ways in which a consumer can seek to avoid GMOs if they so choose In each chapter key topics are addressed through question and answer boxes Real case histories illustrate the development and regulation of GMOs and by the end of the book the reader will be able to make an informed choice about whether to support or challenge this technology the products of which are increasingly pervasive
