Beyond Legitimation:

Beyond Legitimation Donald Wiebe, 2016-01-01 The early essays in this volume proceed on the assumption that a compatibility system can be fashioned that will not only bring religious knowledge claims into harmony with scientific claims but will also show there to be a fundamental similarity of method in religious and scientific thinking They are not however unambiguously successful Consequently Professor Wiebe sets out in the succeeding essays to seek an understanding of the religion science relationship that does not assume they must be compatible That examination in the final analysis reveals a fundamental contradiction in the compatibility system building programme which more than suggests that religious belief knowledge is beyond legitimation

Scientific Models for Religious Knowledge Andrew Ralls Woodward, 2018-08-14 Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In *Scientific Models for Religious Knowledge* the author aims to get outside typical polarized debates between traditional a priori theism and radical scientific naturalism Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science and the scientific study of religion *Scientific Models for Religious Knowledge* is useful for readers looking to expand their

learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities
