Beyond Perspective:

Transformation Processes in Europe and Beyond Florian Weber, Olaf Kühne, Julia Dittel, 2024-07-05 Europe and the world in all their diversity and complexity have always been and continue to be in a state of change Recent geo political environmental social and economic developments demonstrate a world in constant flux These ever changing framework conditions require corresponding transformations in many different structures This anthology takes these observations as a starting point to illuminate theoretical perspectives methodological approaches and empirical insights related to recent transformation processes in Europe and beyond with a special focus in this respect on the USA In view of their comprehensive nature transformation processes cannot be analysed from a single perspective a uniform approach or theory would fail to address their complexity and contingency In this sense horizontal geographies serves as our theoretical framework The concept refers to comprehensive synthesizing regional analyses which collect structure and reflect on knowledge with diverse spatial social and cultural contexts The interdisciplinary and international authorship does justice to the idea of horizontal multi perspective geographies and considers a wide range of transformation processes in Europe and beyond
