Kondo, 2012-12-06 When I became President of International Astronomical Union Commission 44 for the triennial period 1985-1988 several members of the Organizing Committee and I agreed that it would be a good idea for our Commission to host a conference on observatories in space in view of their increasingly important role in astronomical research IAU Colloquium Number 123 *Observatories in Earth Orbit and Beyond* is the first colloquium sponsored by IAU Commission 44 on Astronomy from Space although Commission 44 has co-sponsored numerous colloquia and symposia in the past The past two decades have seen a flourishing of astronomical observatories in space Over a dozen orbiting observatories have opened up a new window on the universe providing hitherto unavailable data in the electromagnetic spectral range from gamma ray X-ray ultraviolet to infrared and radio This has clearly demonstrated the crucial nature of astronomical observations from space The invited talks of present colloquium consist primarily of reviews of currently operating observatories in space future observatories that have been approved by sponsoring government or space agencies the launch systems of USAESAUSSR and Japan discussions of various orbits and sites such as the Moon and alternate approaches in designing space observatories Several panel discussions addressed those issues as well as the major unsolved problems of astronomy Contributed poster papers included descriptions of space observatories that are in planning stage **Beyond Biryani: The Making of a Globalised Hyderabad** Dinesh C.  This volume *The Sun to the Earth and Beyond Panel Reports* is a compilation of the reports from five National Research Council NRC panels convened as part of a survey in solar and space physics for the period 2003-2013. The NRC's Space Studies Board and its Committee on Solar and Space Physics organized the study. Overall direction for the survey was provided by the Solar and Space Physics Survey Committee whose report *The Sun to the Earth and Beyond: A Decadal Research Strategy in Solar and Space Physics* was delivered to the study sponsors in prepublication format in August 2002. The final version of that report was published in June 2003. The panel reports provide both a detailed rationale for the survey committee's recommendations and an expansive view of the numerous opportunities that exist for a robust program of exploration in solar and space physics.
