Beyond Aphasia Therapies For Living With Communication Disability:

Beyond Aphasia Carole Pound, Susie Parr, Jayne Lindsay, Celia Woolf, 2018-10-24 This book focuses explicitly on therapeutic techniques developed from a social model approach to disability and learning to live with difference. It describes theories, activities, and methods of implementation developed from the work of Connect with people with long term aphasia. Theoretical discussion runs alongside practical ideas for therapy and evaluation, case studies, and commentaries from the authors regarding the method and means of implementation. Synthesises theory and practice in this new area of service delivery. Its non-impairment led focus of the therapies means that it has wide appeal to therapists, health service professionals, and volunteers who work with people with chronic disabilities affecting lifestyle and communication. **Beyond aphasia** C. Thompson, Linda Worrall, 2008 As a consequence of the disability movement the thinking generated by the World Health Organization's classification of disability and functioning and an upturn in concern for the long term consequences of aphasia it has become apparent that two distinctive pathways for the treatment of aphasia have emerged over the past decade The first and most traditional involves assessment and management directed toward lessening the effects of the impairment of aphasia while the second pathway focuses less on specific language than on the psychosocial consequences of aphasia This unique text specifically contrasts impairment and consequences focused treatment with the aim of providing clinicians with a level playing field that permits them to evaluate for themselves the relative contributions that each approach provides to evaluate their relative strengths and weaknesses and finally to seek common ground An opening chapter sets the scene while the heart of the book based on real cases concerns five meticulously described yet hypothetical individuals with aphasia In each of the cases detailed descriptions and assessment results are provided and clinical management plans representing each approach are presented internationally by recognized expert clinicians
