Beyond Geometry Experiments In Form 1940s 70s:

Beyond Geometry Lynn Zelevansky, 2004 *Beyond Geometry* Lynn Zelevansky, Valerie L. Hillings, 2004 Beyond Geometry brings together examples of European and Latin American concrete art Argentine Arte Mad Brazilian Neo Concretism Kinetic and Op Art Minimalism and various forms of post Minimalism including systematic forms of process and conceptual art

Making Art Concrete Pia Gottschaller, Aleca Le Blanc, Zanna Gilbert, Thomas Learner, Andrew Perchuk, 2017-09-16 In the years after World War II artists in Argentina and Brazil experimented with geometric abstraction and engaged in lively debates about the role of the artwork in society Some of these artists used novel synthetic materials creating objects that offered an alternative to established traditions in painting proposing that these objects become part of everyday concrete reality Combining art historical and scientific analysis experts from the Getty Conservation Institute and Getty Research Institute are collaborating with the Colección Patricia Phelps de Cisneros a world renowned collection of Latin American art to research the formal strategies and material decisions of these artists working in the concrete and neo concrete vein Making Art Concrete presents works by Lygia Clark Willys de Castro Judith Lauand Raúl Lozza Hélio Oiticica and Rhod Rothfuss among others with spectacular new photography The photographs along with information about the now invisible processes that determine the appearance of these works are key to interpreting the artists technical choices as well as the objects themselves Indeed this volume sheds further light on the social political and cultural underpinnings of the artists propositions making a compelling addition to the field of postwar Latin American art *Federal Register Index*,

Exploidity Nancy Perloff, 2017-01-21 The artists books made in Russia between 1910 and 1915 are like no others Unique in their fusion of the verbal visual and sonic these books are meant to be read looked at and listened to Painters and poets including Natalia Goncharova Velimir Khlebnikov Mikhail Larionov Kazimir Malevich and Vladimir Mayakovsky collaborated to fabricate hand lithographed books for which they invented a new language called zaum a neologism meaning beyond the mind which was distinctive in its emphasis on sound as such and its rejection of definite logical meaning At the heart of this volume are close analyses of two of the most significant and experimental futurist books Mirskontsa Worldbackwards and Vzorval Exploidity In addition Nancy Perloff examines the profound differences between the Russian avant garde and Western art movements including futurism and she uncovers a wide ranging legacy in the midcentury global movement of sound and concrete poetry the Brazilian Noigandres group Ian Hamilton Finlay and Henri Chopin contemporary Western conceptual art and the artist's book Sound recordings of zaum poems featured in the book are available at www.getty.edu

Federal Register, 2004-04 **David Lamelas** María José Herrera, Kristina Newhouse, 2017-09-16 Published by the University Art Museum California State University Long Beach in association with Getty Publications The renowned Argentine conceptual artist David Lamelas born 1946 has an expansive oeuvre of sensory restive and evocative work This book published to coincide with the first monographic exhibition of the artist's work in the United States offers an incisive look into Lamelas's

art The guiding analytic theme is the artist's adaptability to place and circumstance which invariably influences his creative production Lamelas left Argentina in the mid 1960s to study at Saint Martin's in London Since then he has divided his time among various cities While the typical narrative invoked about artists like Lamelas is one of internationalism his nomadic movement from one place or conceptual framework to the next has always been more postnational than international

Concerning Consequences Kristine Stiles, 2016-03-21 Kristine Stiles has played a vital role in establishing trauma studies within the humanities A formidable force in the art world Stiles examines the significance of traumatic experiences both in the individual lives and works of artists and in contemporary international cultures since World War II In *Concerning Consequences* she considers some of the most notorious art of the second half of the twentieth century by artists who use their bodies to address destruction and violence The essays in this book focus primarily on performance art and photography From war and environmental pollution to racism and sexual assault Stiles analyzes the consequences of trauma as seen in the works of artists like Marina Abramovic Pope L and Chris Burden Assembling rich intellectual explorations on everything from Paleolithic paintings to the Bible's patriarchal legacies to documentary images of nuclear explosions *Concerning Consequences* explores how art can provide a distinctive means of understanding trauma and promote individual and collective healing
