Beyond Productivity:

Beyond Productivity National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Information Technology and Creativity, 2003-05-02 Computer science has drawn from and contributed to many disciplines and practices since it emerged as a field in the middle of the 20th century Those interactions in turn have contributed to the evolution of information technology new forms of computing and communications and new applications that continue to develop from the creative interactions between computer science and other fields Beyond Productivity argues that at the beginning of the 21st century information technology IT is forming a powerful alliance with creative practices in the arts and design to establish the exciting new domain of information technology and creative practices ITCP There are major benefits to be gained from encouraging supporting and strategically investing in this domain

Beyond Productivity , 1984 The Presence of the Absence Sarah K, 2025-10-30 This book takes the position that we currently occupy a collective field of enormous productivity which is negatively impacting our earthly ecosystems at scale Every contemporary problem or brief designed or otherwise contributes to the further imbalance of our environment by producing something more of a material nature as a solution The author envisages a near future when we have lost interest not only in consumerism but in producing things as we do in the current paradigm To get there she suggests we might embrace an intentional absence or presence of absence of the human made into any designed outcome just as it has always been incorporated into non Western cultures It is an open invitation to join the author in applying this radical vision to the future of our designed and built world in newly imagined ways The deep thinking layered with lived experience and lots of personal anecdotes gives this book a resonance that make it an inspirational read for any creative person wondering about their place in the current environmental and cultural climate **Beyond Productivity** Gregory G. Dess, Joseph C.

Picken, 1999 You've got the best employees available all hand picked for their knowledge skills and creativity But do you know how to make the most of them Do you know how to leverage this wealth of human capital and make your people your most powerful competitive tool **The role of agriculture in economic development. Focusing on linkages beyond agriculture** Veena Soni, 2020-06-19 Academic Paper from the year 2020 in the subject Economics Economic Cycle and Growth language English abstract Those of us who preach the gospel of agriculture with evangelical zeal find the text compelling and convincing We are regularly possessed by the spirit only to look around and see out colleagues in other sectors in country management or even our senior management doubting yawning or subtly edging towards the door We face the implicit query If agriculture can do such great things why have they not yet happened The past decade has been one of agro pessimism The promises that agricultural development seem to hold did not materialise This pessimism seemed to coincide with pessimism about Sub Saharan Africa Especially for Sub Saharan Africa the hope was that economic development would be brought about by agricultural development After the success of the green revolution in Asia the hope

was that a similar agricultural miracle would transform African economies But this hope never materialised agricultural productivity did not increase much in SSA and worse the negative effects of the green revolution in Asia became more apparent such as pesticide overuse and subsequent pollution Also in Asia the yield increases tapered off The sceptics put forward several arguments why agriculture is no longer an engine of growth For instance the liberalisation of the 1990s and greater openness to trade has led to a reduction in the economic potential of the rural sector cheap imported Chinese plastic buckets out compete the locally produced pottery On the other hand it does mean cheaper imported supplies With rapid global technical change and increasingly integrated markets prices fall faster than yields rise So rural incomes fall despite increased productivity if they are net producers The integration of rural with urban areas means that healthy young people move out of agriculture head to town leaving behind the old the sick and the dependent It is often also the men who move to urban areas leaving women in charge of the farm This has resulted in the increased sophistication of agricultural markets and value chains which excludes traditional smallholders who are poorly equipped to meet the demanding product specifications and timeliness of delivery required by expanding supermarkets The natural resource base on which agriculture depends is poor and deteriorating

Saving Time Jenny Odell, 2023-03-07 NEW YORK TIMES BESTSELLER The visionary author of *How to Do Nothing* returns to challenge the notion that time is money Expect to feel changed by this radical way of seeing *Esquire* One of the most important books I've read in my life Ed Yong author of *An Immense World* A BEST BOOK OF THE YEAR Harper's Bazaar *Esquire* Chicago Public Library Electric Lit In her first book *How to Do Nothing* Jenny Odell wrote about the importance of disconnecting from the attention economy to spend time in quiet contemplation But how can we reclaim our time In order to answer this seemingly simple question Odell took a deep dive into the fundamental structure of our society and found that the clock we live by was built for profit not people This is why our lives even in leisure have come to seem like a series of moments to be bought sold and processed ever more efficiently Odell shows us how our painful relationship to time is inextricably connected not only to persisting social inequities but to the climate crisis existential dread and a lethal fatalism This dazzling subversive and deeply hopeful book offers us different ways to experience time inspired by pre industrial cultures ecological cues and geological timescales that can bring within reach a more humane responsive way of living As planet bound animals we live inside shortening and lengthening days alongside gardens growing birds migrating and cliffs eroding the stretchy quality of waiting and desire the way the present may suddenly feel marbled with childhood memory the slow but sure procession of a pregnancy the time it takes to heal from injuries Odell urges us to become stewards of these different rhythms of life in which time is not reducible to standardized units and instead forms the very medium of possibility *Saving Time* tugs at the seams of reality as we know it the way we experience time itself and rearranges it imagining a world not centered on work the office clock or the profit motive If we can save time by imagining a life identity and source of meaning outside these things time might also save us
