Beyond Relativism:

Beyond Relativism Roger D. Masters,1993 **Beyond Relativism** Cynthia Lins Hamlin,2004-01-14 This book argues that critical realism offers the theory of cognitive rationality a real way of overcoming the limitations of methodological individualism by recognising both the agents and the social structures causal powers and liabilities Cynthia Lins Hamlin persuasively argues that critical realism represents a better safeguard against the relativism which springs from the conflation of social reality and our ideas about it This is an important book for sociologists and anyone working in the social sciences and for all those concerned with the methodology and philosophy of social science [Ethics, Human Rights and Culture](#) X. Li,2006-01-27 Is it possible given culturally incongruent perspectives to validate any common standards of behaviour Is cultural relativity be a problem when cultures are porous Can we implement human rights without incorporating the idea into the fabric of culture This book addresses such questions with an inventive and original understanding of culture

Truth Beyond Relativism Gregory Baum,1977 **Beyond Relativism** ,1979 **Relativism and Beyond** Yoav Ariel,Shlomo Biderman,Ornan Rotem,2023-03-20 A collection of essays in which philosophers of widely different interests grapple with the problem of the relative and the absolute in philosophy and religion A concluding article tries to advance beyond the simple antithesis to a more sophisticated and adequate conception **Beyond Relativism in Political Theory** Arnold Brecht,1947 **Beyond Anarchy and Tyranny in Religious Epistemology** Charles Hawkins,1997 *Beyond Anarchy and Tyranny in Religious Epistemology* reveals the implications of the poststructuralist encounter with critical theory for postliberal theology The explication and examination this book entails focus on the contours of the postliberal project the development and present state of critical theory the fundamental arguments of the poststructuralists and the interchange of the three within the larger philosophical landscape A constructive proposal as to the shape of a religious epistemology after modernity is based upon the critique and analysis of this philosophical theological landscape **Anxiety in the Era of Uncertainty** Ali Chavoshian,Jung Eun Sophia Park,2025-03-20 The burgeoning field of Lacan studies critiques that most discourses have been formed in dominant cultures considering the impacts of Western imperialism on the structure of non Western or postcolonial human subjects This groundbreaking work invites readers to read Jacques Lacan's Seminars in an interdisciplinary way with scholars from diverse backgrounds Readers will see a new picture of anamorphosis emerge with possible transformation while facing the uncanny feeling of anxiety through the global peoples perspectives **Jewish Theology for a Postmodern Age** Miriam Feldmann Kaye,2019-03-08 Through a critical study of the writings of Rav Shagar and Tamar Ross Miriam Feldmann Kaye asks how Jewish theology can survive the tide of postmodernism and its refutation of a single objective and ultimate truth and suggests how aspects of postmodernism might be conceived of as a potential resource for rejuvenating religion **Beyond Objectivism and Relativism** Richard J. Bernstein,1983-01-01 Drawing freely and expertly from Continental and analytic traditions Richard Bernstein examines a number of debates and controversies

exemplified in the works of Gadamer Habermas Rorty and Arendt He argues that a new conversation is emerging about human rationality a new understanding that emphasizes its practical character and has important ramifications both for thought and action

Beyond Reason and Tolerance Robert Joseph Thompson,2014-03 Beyond Reason and Tolerance argues that to prepare students to engage political ethnic and religious differences higher education must adopt a developmental model for a formative and liberal undergraduate education

Beyond Relativism Robert C. Hunt,2007-03 Can elements of one culture kinship relations for example be profitably compared to similar elements in other cultures According to much anthropological thinking of recent decades the answer is no Cultures are closed systems many people argue and their internal elements can only be understood with respect to the culture as a whole Cultural anthropologist Robert C Hunt drawing on his vast experience studying cultures around the world here makes a powerful counter argument that the various elements making up a culture not only can but must be compared across cultures if we are to understand them at all Cultural comparison is not easy and it cannot eliminate all ambiguity but it is necessary if we are to develop a scientific understanding of how cultures work This intriguing polemic will appeal to students of cultural anthropology sociology and ethnic studies especially those interested in the theoretical grounding of these disciplines

Beyond Positivism And Relativism Larry Laudan,1996-02-08 With the decline of logical positivism after 1950 much work in the philosophy of science has careened toward an uncritical relativistic approach Many scholars faced with a choice between a narrowly restrictive positivism and an anything goes relativism have sought to find a middle path in the debate In this collection of papers several of which appear here for the first time Larry Laudan

argues that resolving this dilemma involves not some centrist compromise position but rather a conception of scientific knowledge that goes beyond both positivism and relativism This conception must begin with the rejection of assumptions about knowledge that these apparently opposed positions hold in common Relativism for Laudan is a particularly self defeating form of neopositivism In showing the connections between these two approaches and clarifying the positions of such influential philosophers as Thomas Kuhn and Paul Feyerabend Laudan does the great service of laying the foundation for an account of science that rejects the errors of positivism without providing aid and comfort to the enemies of reason He also takes a fresh look at many other central issues of scientific philosophy including the science non science demarcation the underdetermination of theory by evidence and the contested role of social factors in the legitimation of scientific knowledge Beyond Positivism and Relativism is a major statement about the nature of science and evidence that will command the interest of philosophers of science epistemologists sociologists of knowledge and all who are seriously concerned about science scientific progress and the implications for knowledge in many other fields India and Beyond Dick van der Meij,2013-09-13 First published in 1997 The International Institute for Asian Studies IIAS is pleased to introduce a new series Studies from the International Institute for Asian Studies This present volume India and Beyond Aspects of Literature Meaning Ritual and Thought contains more than 30 contributions from well established scholars from different disciplinary backgrounds These essays are in honour of one of the founding fathers of the IIAS Frits Staal Professor Emeritus of Philosophy and South Asian Languages University of California at Berkeley This volume is edited by Dick van der Meij editor of the Indonesian Netherlands Cooperation in Islamic Studies Programme at Leiden University **Women and International Human Rights Law** Gayatri Patel,2019-12-06 This book presents the findings of the first comprehensive study on the most recent and most unique and innovative method of monitoring international human rights law at the United Nations Since its existence there has yet to be a complete and comprehensive book solely dedicated to exploring the Universal Periodic Review UPR process Women and International Human Rights Law provides a much needed insight to what the process is how it operates in practice and whether it meets its fundamental aim of promoting the universality of all human rights The book addresses the topics with regard to international human rights law and will be of interest to researchers academics and students interested in the monitoring and implementation of international human rights law at the United Nations In addition it will form supplementary reading for those students studying international human rights law on undergraduate programmes and will also appeal to academics and students with interests in political sciences and international relations **International Journal of Ethics** ,1926
