Rewilding in Practice Ian Convery,Steve Carver,Monica T. Engel,Sally Hawkins,Rene Beyers,Yue Cao,2025-03-03 Rewilding is a long term and large scale process which works to restore degraded ecosystems or social ecological systems to the point that they are resilient and self sustaining and therefore requiring little in terms of conservation management Rewilding practice focuses on re establishing ecological processes including trophic levels that were lost mainly due to anthropogenic disturbance It also aims to affect a paradigm shift in human nature relationships with intentions to better understand the interdependencies between humans and nature so that people can appreciate and accommodate nature in their landscapes and make more informed and sustainable decisions about how we live In this sense rewilding has real transformational potential
