Mentoring Beginning Teachers Jean Boreen, 2000. Mentorship Jill M. Reilly, 1992. Recommended by the U.S. Department of Education. Mentorships help students get real life skills and experiences. This book based on the highly successful mentor connection program describes how to establish a successful program similar to that developed by the author. Teacher mobility is on the rise. Some may assume that the job of teaching varies little from place to place but school cultures and expectations can differ significantly. While a considerable amount of research exists on the socialization and mentoring of entry year teachers in schools, little is available on the experiences of teachers changing schools mid career. This study examined the experiences and impact of induction and mentoring on three teachers transitioning to American Middle School (AMS) after building a career elsewhere. Research questions addressed new experienced teachers (NETs) perceptions of their transition to teaching at American School District (ASD) and the impact of the ASD mentoring program on their transition to the district. A qualitative case study method was used in order to capture the impressions and experiences of transitioning teachers in their day to day instruction, interactions with colleagues and in the ASD Induction and Mentoring program. Typological, inductive and interpretive analyses were used to synthesize the themes from participant data. Through surveys, interviews and program documents, participants revealed stories of school culture, infrastructure, teacher leadership and relationships and the ways in which these systems impacted their transition. Findings showed that new experienced teachers came with their own defined ideas and beliefs about instruction, made an impact on school culture, needed time to adjust to their new setting and benefitted from socialization and collaboration with peers. These findings have implications for administrators and teacher leaders seeking to improve schools and assist in the transition of mid career teachers to new roles and settings. Induction and mentoring programs for NETs should be flexible, honor the knowledge and experience of

incoming faculty and provide professional development for both mentors and mentees Bibliographic Guide to Education
