## **Beyond The New Morality:**

**Beyond the New Morality** Germain Grisez, Russell Shaw, 1988-09-30 First published in 1974 with a second revised edition in 1980 *Beyond the New Morality* third edition retains the best elements of the earlier versions including the authors clear straightforward presentation and use of nontechnical language Although the basic approach content and organization remain substantially the same the new edition does develop and amend some aspects of the theory For example the community dimension of morality is brought out more clearly and the first principle of morality is now formulated more accurately in terms of willing in line with integral human fulfillment We are proposing an ethics But what is ethics As we use the word it means a philosophical study of morality of the foundations on which morality is based and of the practical implications of a systematic moral outlook We believe ethics must start by clarifying the fundamental notions of freedom action and community Then it can go on to examine the question What is the ultimate distinction between moral good and moral evil between action which is right and action which is wrong An answer becomes useful in practice however only after one has worked out a satisfactory way of thinking through concrete moral issues Should I do this or that Thus we next turn to the problem of establishing basic moral principles Finally once one is in a position to take a reasoned view of moral issues it is possible to ask and try to answer the question To what extent can I close the gap in my life and in society between the way I think things ought to be and the way they are History studies human actions but it looks at particular actions which have actually taken place ethics is concerned with human action in general or with possible kinds of actions Psychology and the social sciences also have somewhat the same subject matter as ethics but they are mainly concerned with how human beings actually do act and societies actually do work ethics concentrates on how persons ought to act and societies ought to be formed and reformed
