Beyond The Sociology Of Knowledge:

Beyond the Sociology of Knowledge Kurt H. Wolff, 1983 **Truth Beyond Relativism** Gregory Baum, 1977

Beyond Sociology's Tower of Babel Bernard S. Phillips, 2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can be applied to human behavior If the arguments and alternative interpretations in this book on the problematic nature of sociology's use of scientific method prove to be credible and fruitful then the implications are profound For example the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior Our present approach assumes implicitly that the pieces of the human jigsaw puzzle can at some point be put together so as to yield a coherent picture Yet as Phillips shows if each piece is itself deficient then no coherent picture emerges when we attempt to put the pieces together Refusing to take the current fragmentation of sociology as inevitable Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the hallmarks of any science His research draws heavily on the works of classical and contemporary theorists philosophers and historians of science as well as on postmodernist critiques and responses to postmodernism This reconstruction will be useful for courses in method in the study of the classical tradition of sociology Bernard Phillips was introduced to sociology at Columbia University by C Wright Mills A former professor of sociology at Boston University cofounder of the ASA Section on Sociological Practice and founder of the Sociological Imagination Group his publications emphasize methodology and theory Sociology of Knowledge Kewal Motwani, 1976 Contributed articles *Boston Studies in the Philosophy of Science*, 1995 The Social Construction of Reality Peter L. Berger, Thomas Luckmann, 1991-03-28 A general and systematic account of the role of knowledge in society aimed to stimulate both critical discussion and empirical investigations This book is concerned with the sociology of everything that passes for knowledge in society It focuses particularly on that common sense knowledge which constitutes the reality of everyday life for the ordinary member of society The authors are concerned to present an analysis of knowledge in everyday life in the context of a theory of society as a dialectical process between objective and subjective reality Their development of a theory of institutions legitimations and socializations has implications beyond the discipline of sociology and their humanistic approach has considerable relevance for other social scientists historians philosophers and anthropologists Knowledge, Science, Religion Mara Borda, 2006 **Culture, Consciousness, and Beyond** Russell

Crescimanno,1982 *AIDS, Philosophy and Beyond* Joseph Wayne Smith,1991 This book attempts to give a comprehensive examination of the principal philosophical issues associated with the AIDS pandemic and in particular with the radical challenges that global diseases raise for modern society and political systems The thesis of the book is that AIDS is but a part of a wider environmental and social crisis that not only challenges received opinion about the relationships between humanity technology and the environment but challenges the ecological adaptability of modern social and political system The challenge posed by AIDS and other diseases likely to appear in the next century are explored in detail **The Sociological Review**,1912 *Man and His Past* Serge Gagnon,1982 Professor Gagnon s book is a comprehensive survey of the views on historiography held by historians sociologists and philosophers in France Britain and the United States over the last forty years or more British and American historians have been most receptive to the relativist thesis which Gagnon espouses while French historians with the exception of Lucien Febvre have not greeted it with much enthusiasm There has been very little discussion of the sociology of history in Canada and by illustrating his viewpoint with Canadian American and particularly French Canadian examples he has brought the issues closer to home There is an abundance of quotes in this volume from scholars of international reputation Carr Croce Collingwood Marc Bloch Beard Becker Febvre Pierre Vilar Raymond Aron Henri Marrou Durkheim Gurvitch to name a few His citations include opponents as well as proponents of historical relativism As the author suggests Even if it aspires to scientific truth historical scholarship is the child of its time When the work of historians is deliberately present minded we may say that the dialogue between the present and the past becomes in a sense a monologue by the present on the past *Participating in the Knowledge Society* Ruth Finnegan,2005-10-28 This interdisciplinary and transhistorical volume focuses on independent researchers creating and participating in knowledge outside the academy from seventeenth century north country astronomers or Victorian naturalists to today s think tanks community historians and web opportunities These intriguing cases raise challenging issues about the location definition and validation of research about active participation in knowledge generation and about the perhaps changing boundaries of university today **Beyond Sociology** Ananta Kumar Giri,2017-12-20 This book explores the contours of a transformational sociology which seeks to reconsider the horizons of sociological imagination It questions accepted modernist assumptions such as the equation of society and nation state the dualism of individual and society and that of ontology and epistemology Arguing that contemporary sociology suffers from what Ulrich Beck calls the Nato like fire power of western sociology it argues that sociology has to open itself to transcivilizational dialogues and planetary conversations about self culture and society The book also challenges scholars to go beyond a privileging of the post traditional telos of modernist sociology and puts forward a foundational interrogation of modernist sociology It underscores the limitations of established conventions of sociology and considering an alternative sociology based upon Confucian vision and practice of self transformation This collection offers a way to go beyond dominant structures of modern sociology and

contemporary dominant ways of thinking about and doing sociology helping us cultivate a transdisciplinary sociology

Another Knowledge Is Possible Boaventura de Sousa Santos, 2020-05-05 This is the third volume of the series *Reinventing Social Emancipation Towards New Manifestoes* *Another Knowledge Is Possible* explores the struggles against moral and cultural imperialism and neoliberal globalization that have taken place over the past few decades and the alternatives that have emerged in countries throughout the developing world from Brazil and Colombia to India South Africa and Mozambique In particular it looks at the issue of biodiversity the confrontation between scientific and non scientific knowledges and the increasing difficulty experienced by great numbers of people in accessing information and scientific technological knowledge

Personal Knowledge and Beyond James V. Spickard, Shawn Landres, Meredith B. McGuire, 2002-02 *Personal Knowledge and Beyond* seeks to foster a cross disciplinary rethinking of ethnography's possibilities and limits for the study of religions It provides an overview of recent debates while also pushing them in new directions

Beyond Ethnocentrism Charles McKelvey, 1991-02-28 In this time of great upheaval in Eastern Europe and the Soviet Union Karl Marx's relevance to contemporary social science may seem remote However this important study by Charles McKelvey shows just the opposite Marx's concept of science can help social scientists gain a greater understanding of today's world society Western ethnocentrism has McKelvey argues isolated the Euro American social scientist from a true picture of conditions in the Third World Modern sociology must rethink itself McKelvey believes in light of Marxian concepts Immanuel Wallerstein's world systems perspective and the cognitional theory of philosopher Bernard Lonergan The main purpose of McKelvey's book is to formulate a social scientific method for the attainment of objective knowledge First the book examines elements of Marx's work which have been overlooked or misunderstood Next McKelvey takes a sociology of knowledge approach and studies Marx's biography in order to grasp the full essence of Marx's concept of science The book then draws on Lonergan's philosophy to reformulate Marx's concept of science in a manner appropriate for the twentieth century The final part of the book illustrates Marx's reconstructed concept of science through discussion of theories of Third World underdevelopment *Beyond Ethnocentrism* will be of great interest to sociologists political scientists historians and philosophers whose work focuses on Marx or Marxist literature social science or Lonergan

Faith and Knowledge Douglas Sloan, 1994 Sloan explores the impact that the Protestant theological renaissance 1925-1960 had on American colleges and universities focusing in particular on the church's most significant claim to have a continuing voice in higher education He traces the role of the national ecumenical and denominational organizations and studies the changing place of college chaplains

The Education Digest, 1970 The editorial aim is to present condensations of articles taken from the leading professional and lay publications

Beyond the Knowledge Crisis Debbie Kasper, 2021-11-18 In the face of complex interwoven planet scale problems many cite the need for more integrated knowledge especially across the natural and social sciences Excessive specialization they argue gets in the way of knowing what we know much less being able to use it to

address urgent socio environmental crises These concerns it turns out go back centuries This book picks up where most leave off exploring the history of how we got here and proposing a way forward Along the way readers find that the synthesis long called for depends on theoretical advancements in social science Fortunately the author argues we have everything we need to achieve those advancements thanks largely to the contributions of Norbert Elias Integrating his insights with history science sociological theory and more this book neatly packages the upgraded paradigm we need to be able to meaningfully address complex socio environmental problems and more intentionally shape humanity s collective future **Sociological Abstracts** ,1978
