Careful Economics Integrating Caring Activities And Economic Science:

Careful Economics Maren A. Jochimsen, 2013-04-17 Much like their authors the ideas behind books can grow and change on the way from proposal to manuscript I originally planned to join the discussion on care and economics at a different more policy oriented level hoping to identify the conditions under which caring services are taken to the market In approaching the task however I realized that economic science lacked an overall concept of caring Economists notions of caring and their knowledge of its basic elements and structural characteristics were fragmented Caring activities were treated in the context of household work unpaid work or subsistence and informal work None of the different approaches shared a common frame of reference This has made it impossible to study caring activities across the various realms of the economy independent of whether provided in a family setting purchased on the market or supplied by the state or society I therefore found I had to begin my questioning earlier at the level of basic understandings and concepts *The Oxford Handbook of Ethics and Economics* Mark D. White, 2019-06-06 Economics and ethics are both valuable tools for analyzing the behavior and actions of human beings and institutions Adam Smith the father of modern economics considered them two sides of the same coin but since economics was formalized and mathematicised in the late 1800s and early 1900s the fields have largely followed separate paths The Oxford Handbook of Ethics and Economics provides a timely and thorough survey of the various ways ethics can do and should inform economic theory and practice The first part of the book Foundations explores how the most prominent schools of moral philosophy relate to economics asks how morals relevant to economic behavior may have evolved and explains how various approaches to economics incorporate ethics into their work The second part Applications looks at the ethics of commerce finance and markets uncovers the moral dilemmas involved with making decisions regarding social welfare risk and harm to others and explores how ethics is relevant to major topics within economics such as health care and the environment With esteemed contributors from economics and philosophy The Oxford Handbook of Ethics and Economics is a resource for scholars in both disciplines and those in related fields It highlights the close relationship between ethics and economics in the past while and lays a foundation for further integration going forward

Doing care and doing economy Wolf Rainer Wendt, 2022-08-22 A book on the need to do economy in a caring way in the global crisis In this situation doing care and doing economy are mutually dependent The context that is described is a multifaceted and complex one It concerns social care state action and the responsibility of companies All actors are involved in caring and managing within an ecological framework for a development that is beneficial to life both locally and globally

A Herstory of Economics Edith Kuiper, 2022-05-12 There were only a few women economists who made it to the surface and whose voices were heard in the history of economic thought of Adam Smith David Ricardo John Maynard Keynes and Milton Friedman right Wrong In this book distinguished economist Edith Kuiper shows us that the history of economic thought is just that a his story by telling the herstory of economic thought from the perspective of women economic writers

and economists Although some of these women were well known in their time they were excluded from most of academic economics and over the past centuries their work has been neglected forgotten and thus become invisible Edith Kuiper introduces the reader to an amazing crowd of female pioneers and reveals how their insights are invaluable to understanding areas of economics ranging from production work and the economics of the household to income and wealth distribution consumption public policy and much more This pathbreaking book presents a whole new perspective on the development of economic thought It will be essential reading for all students and scholars of the history of economic thought and feminist economics

Is There a Future for Heterodox Economics? Geoffrey M. Hodgson, 2019 Over the last 50 years the community of heterodox economists has expanded and its publications have proliferated But its power in departments of economics has waned Addressing this paradox this book argues that heterodox economists are defined more by left ideology than by a shared understanding of the nature of orthodox economics and of what should replace it Heterodox economists cannot agree on what heterodoxy means This volume applies work on the social nature and institutions of science to help explain the failure of heterodox economics to gain ground It assesses some strategic options for its future

Conceptualizing Capitalism Geoffrey M. Hodgson, 2015-09-22 Capitalism is the dominant economic framework in modern history but it is unclear how it really works Relying on the free movement and spontaneous coordination of seemingly infinitesimal market forces its very essence is remarkably complex Geoffrey M Hodgson offers a more precise conceptual framework defines the concepts involved and illustrates that what is most important and what has been most often overlooked are institutions and contracts the law Chapter by chapter Hodgson focuses in on how capitalism works at its very core to develop his own definitive theory of capitalism By employing economic history and comparative analysis toward explanatory and analytical ends Hodgson shows how capitalism is not an eternal or natural order but indeed a relatively recent institution If anyone were qualified to venture such a comprehensive and definitive analysis of such an important economic legal and social phenomenon it is Geoffrey Hodgson *Conceptualizing Capitalism* will significantly alter and carry forward our understanding of markets and how they work

Capabilities, Gender, Equality Flavio Comim, Martha C. Nussbaum, 2014-04-17 Questions of gender injustice and equality pervade all our lives and as such the capabilities or human development approach to understanding well being and basic political entitlements continues to be debated In this thought provoking book a range of authors provide unique reflections on the capabilities approach and specifically Martha C Nussbaum's contributions to issues of gender equality and political liberalism Moreover the authors tackle a broad range of development issues including those of religion ecological and environmental justice social justice child care disability and poverty This is the first book to examine Nussbaum's work in political philosophy in such depth bringing together a group of distinguished experts with diverse disciplinary perspectives It also features a unique contribution from Nussbaum herself in which she offers reactions to the discussion and her latest thoughts on the capabilities approach *Capabilities Gender Equality*

will interest a wide range of readers and policymakers interested in new human development policies *Food for Degrowth* Anitra Nelson, Ferne Edwards, 2020-11-22 This collection breaks new ground by investigating applications of degrowth in a range of geographic practical and theoretical contexts along the food chain Degrowth challenges growth and advocates for everyday practices that limit socio metabolic energy and material flows within planetary constraints As such the editors intend to map possibilities for food for degrowth to become established as a field of study International contributors offer a range of examples and possibilities to develop more sustainable localised resilient and healthy food systems using degrowth principles of sufficiency frugal abundance security autonomy and conviviality Chapters are clustered in parts that critically examine food for degrowth in spheres of the household collectives networks and narratives of broader activism and discourses Themes include broadening and deepening concepts of care in food provisioning and social contexts critically applying appropriate technologies appreciating and integrating indigenous perspectives challenging notions of waste circular economies and commodification and addressing the ever present impacts of market logic framed by growth This book will be of greatest interest to students and scholars of critical food studies sustainability studies urban political ecology geography environmental studies such as environmental sociology anthropology ethnography ecological economics and urban design and planning

Cash and Care Caroline Glendinning, Peter Kemp, 2006 Recent social trends and policy developments have called into question the divide between the provision of income support and social care services This book examines this in light of key trends The book presents new evidence on the links between cash whether from earnings from paid work social security benefits and payments for disabled people and carers and social disadvantage care and disability It presents theoretical perspectives on the need for and provision of care which some commentators have described as a new social risk and offers new insights into traditional forms of risk such as poverty disability access to credit and money management It provides an analysis of childcare and informal support for sick disabled or elderly people in the context of increasing female labour market participation and the introduction of cash allowances to pay for care and posits a new look at both disabled people and older people in their roles as active citizens whose views and experiences should help shape both policy and practice Cash and care is essential reading for students lecturers and researchers in social policy applied social science social work and health and social care
