Carlo Scarpa Carlo Scarpa, Francesco Dal Co, Giuseppe Mazzariol, 1984 Briefly traces the life and career of the Italian architect gathers his drawings and shares his lectures and opinions on architecture This volume documents the complete works of Carlo Scarpa one of the leading Italian architects of the twentieth century There are over two dozen essays by leading architects and architectural critics including Bruno Zevi Vincent Scully Arata Isozaki and Christian Norberg Schulz offering an extensive overview of Scarpa's life and career as well as lucid interpretations of his architecture [Carlo Scarpa](#)

Francesco Dal Co, Giuseppe Mazzariol, 1986-01-01 **Carlo Scarpa : the Complete Works** Carlo Scarpa, 1984 *Carlo Scarpa; the complete works* F. dal Co, 1984 **Carlo Scarpa, Architect** Carlo Scarpa, R. Nicholas Olsberg, 1999 Between 1953 and 1978 the Italian architect Carlo Scarpa produced an incredibly varied range of works that challenge our notions of what modern architecture might be Foremost in that work was the need to reconcile a wholehearted embrace of the new with the longstanding traditions of local craft and of universal practice to create an architecture that would clearly express its own machine driven times without abandoning the psychic and sensual forces of place materiality and memory Carlo Scarpa Architect *Intervening with History* illustrates through abundant reproductions of Scarpa's drawings the ways the architect created a dialogue with light space and architecture within the historic fabric of Italian cities Presenting these projects as they exist today the patient eye of contemporary photographer Guido Guidi deepens our understanding of this timely approach to architectural dialogue **Materials and Meaning in Architecture** Nathaniel Coleman, 2020-02-20 Interweaving architecture philosophy and cultural history *Materials and Meaning in Architecture* develops a rich and multi dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad ranging study shows how the most engaging built works are as tactile as they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect's work to consider the enduring expressive possibilities of material use in architecture The book's chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers *Materials and Meaning in Architecture* will cause theorists to rethink their assumptions and designers to see new potential for their projects **Encyclopedia of Twentieth**

Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries

Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic A Critical History of Modern Architecture is certain to influence any future debate on the evolution of modern architecture Studies in Tectonic Culture is nothing less than a rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German

and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press Carlo Scarpa Robert McCarter,2017-05-07 The acclaimed survey of the life and works of the celebrated Italian modernist master available for the first time in paperback The work of Carlo Scarpa challenged and continues to challenge accepted notions of modern architecture While several books have been published on his work none has approached the breadth and depth of this monograph by Robert McCarter who is celebrated for his meticulously researched experientially based and jargon free accounts of key figures in modern architecture This book is the definitive study of Scarpa s many accomplishments including such works at the Canova Museum the Castelvechio Museum and the Brion Cemetery among others *Architectural Record* ,1988 The British Library General Catalogue of Printed Books, 1986 to 1987 British Library,1988 Carlo Scarpa.
