Between Two Generations:

Entrepreneurship Across Generations Eleanor Hamilton, 2013 There is so much to praise in this important and timely book Drawing on unique fresh and intimate qualitative studies of families and the complex histories of their lives and businesses the book will invigorate entrepreneurial studies with its intricate theoretically bold and innovative analysis The author takes us on a sensitive and fascinating journey with these families and makes an outstanding contribution conceptually politically ethically and methodologically to the field showing us how narratives are not simply methodological tools but ontological resources for gender and identify formation It is an elegant and refreshing book which will be a rewarding and enlivening read for students and researchers Elaine Swan University of Technology Sydney Australia Thoughtful perceptive and meticulously researched Eleanor Hamilton s Entrepreneurship across Generations is an important contribution that will help advance the field of family business studies both conceptually and empirically Based on fascinating field work with families in business and placing family at the very heart of her study Hamilton shows through the stories her subjects tell just how deeply and complexly family and firm are intertwined A must read for all those interested in family firm entrepreneurship Andrew Popp University of Liverpool Management School UK Entrepreneurship across Generations examines dimensions of identity gender and learning to understand the complex fabric of family business An interpretation of narratives from two generations in five families constitutes entrepreneurship as an inherently social rather than individual phenomenon This enriching book explains how entrepreneurial capacity is shared between generations showing how learning is embedded within everyday social practice in the family and the business It explores patriarchal practice and gendered entrepreneurial identities in family business The author challenges dominant discourses of entrepreneurship She argues that entrepreneurial identities are mediated by narrative and subject to constant negotiation within and across generations With a new perspective on entrepreneurship this insightful study will be essential and supplementary reading for students and practitioners within the field of entrepreneurship and family business

A Piece of the Pie Stanley Lieberman, 1980 There is little

question that the descendants of the new European immigrant groups from Southern Central and Eastern Europe have done very well in the United States reaching levels of achievement far above blacks Yet the new Europeans began to migrate to the United States in 1880 a time when blacks were no longer slaves Why have the new immigrants fared better than the blacks This volume focuses on the historical origins of the current differences between the groups Professor Lieberman scoured early U S censuses and used a variety of offbeat information sources to develop data that would throw light on this question as well as provide new information on occupations at the turn of the century finding remarkable parallels between the black position in the urban South and the urban North He examines and compares progress in education and in politics between the new Europeans and the blacks What were the effects of segregation Why did labor unions discriminate more severely against blacks than against the new immigrant groups This book will generate a fresh interpretation of the origins of black new European differences one which explains why other nonwhite groups such as the Chinese and Japanese have done relatively well
