## **Beyond 1995 The Future Of The Npt Regime:**

**Beyond 1995** R.E. Pendley, J.F. Pilat, 2012-12-06 There is almost universal support for the view that the world would be an even more dangerous place if there were to be more nuclear weapon states There would be more fingers on more triggers and probably a greater risk that a trigger might be pulled with incalculable consequences It is easy to see therefore that there is a collective interest in avoiding the spread of nuclear weapons to further countries Nations do not however normally undertake or refrain from actions because of such a collective interest they do so because of their individual interests This is especially true in the field of national security A nation perceiving that it has a real interest in developing nuclear weapons is not very likely to refrain from doing so merely because it is told such development would be bad for the world community If the global interest in avoiding the spread of nuclear weapons to more countries is to succeed conditions that make it in the interest of each individual nation to renounce nuclear weapons need to be created or maintained Fortunately conditions have prevailed in which the vast majority of nations have seen an advantage in making legally binding nonproliferation commitments An important rationale for many of these countries has been that these commitments would facilitate the transfer of desired civil nuclear technology *The Future of the Non-Proliferation Treaty* Darryl Howlett, John Simpson, 2016-07-27 In 1995 a Conference is to be convened to review and extend the Treaty on the Non-Proliferation of Nuclear Weapons NPT The Future of the NPT brings together a distinguished group of individuals including the elected President of the 1995 NPT Conference to analyse four crucial agenda areas relevant to the Conference the preConference activities to be undertaken by both States Parties and the Conference Secretariat those security issues that relate to a review of the treaty such as nuclear disarmament and security assurances peaceful uses and verification questions and regional issues With nuclear nonproliferation currently occupying a prominent position on the international security agenda the 1995 Conference offers a unique opportunity for a constructive discussion on these areas and it is hoped that this volume will provide a contribution to that end Networked Nonproliferation Michal Onderco, 2021-10-05 The Treaty on Non-Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear

nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

**Stopping the Spread of Nuclear Weapons** David Fischer, 1992 Fischer who helped draft the original charter of the International Atomic Energy Agency IAEA provides a detailed historical account of current non proliferation treaties and controls He notes that originally the proliferation problem was how to permit the development of nuclear power for cheap energy without permitting countries to develop bombs now the problem is how to prevent countries determined to build atomic bombs from acquiring the requisite technology Many technologies explosives computers nuclear energy that are key to the development of nuclear weapons also have other legitimate applications Fischer recommends reorienting the current non proliferation regime which is largely a Soviet American invention into one also supported by economic powers the European Community and Japan and that potential new nuclear states and closet nuclear powers be brought under broader IAEA controls ISBN 0 415 00481 0 66 95

Human Rights, Human Security, and State Security Saul Takahashi, 2014-07-15 This book provides innovative thinking from a variety of perspectives on the important human rights human security and national security policy issues of today and how these issues intersect The issue of human security comes into play in nearly every important policy debate in global politics and the protection of human rights is now recognized as one of the main functions of any legitimate modern state How can the international community best ensure that human rights are protected while simultaneously protecting state security Who should intervene in cases of mass gross violations and when are military actions justified This book seeks to address and explore these difficult and pressing questions by presenting the differing views of commentators from various ends of the spectrum Human Rights Human Security and State Security The Intersection consists of three volumes with each focusing primarily on one of the three broad areas while also drawing connections between them A powerful resource for policy makers and practitioners in national governments members of international organizations and scholars the innovative thinking presented will give readers a deepened understanding of the various international issues and help them to formulate effective policies in today s complex international landscape

**The US-DPRK Peace Treaty: A Commentary** Eric Yong Joong Lee, Ridoan Karim, 2022-09-21 This book delivers an in depth analysis of the US DPRK Peace Treaty which will be concluded as a final result of the Korean Peninsula peace process that is currently ongoing Since North Korea launched its nuclear weapons development program in the early 1990s the Korean peninsula has become a critical point of global politics along with the Sino American G2 hegemonic competition The US DPRK Peace Treaty is the key to the denuclearization and de jure peace on the peninsula as well as Northeast Asia Different from the comprehensive peace treaty between the four parties US China and the two Koreas already proposed for the past few years the book suggests a bilateral approach to the agreement between the US and the DPRK which will trigger the peace as a system considering the US s practices in this regard after 1783 Such a challenging and provocative method provides deeper understanding of the legal

and political circumstances for the expected US DPRK Peace Treaty The book will navigate scholars practitioners and students towards terminating the 1953 Armistice establishing nuclear peace as well as a rapprochement between the two countries In practice it will be a useful guideline for the conflicting parties in the various parts of the globe to adopt peace treaties in the twenty first century

**Nuclear Non-proliferation and Global Order** Harald Müller, David Fischer, Wolfgang Kötter, 1994 This book presents different views on nuclear disarmament and arms control and a brief history of nuclear non proliferation policy and the nuclear test ban issue It describes the preparations for and results of the 1990 Non Proliferation Treaty Review Conference and the 1991 Partial Test Ban Treaty Amendment Conference With a view to 1995 it assesses the chances for consensus or dissension regarding regarding nuclear proliferation and the test ban and the prospects for an extension of NPT It concludes by examining the future and the threat of a new North South divide over these issues
