**Beyond Ourselves** D. Kroeker, 2014-03-28 So often in the Christian community we hear the question What do we need to do to reach the unreached While this appears to be a good question perhaps its the wrong question Instead of focusing on what might be best practices our answers tend to revolve around what are best practices for us The better question is How can the unreached be reached This takes us out of the center of the story and seeks to find the best methods and means to reach those who need to clearly hear the good news of Gods grace

**Beyond Ourselves: Leader's Manual** Roger Morgan, 2018 Beyond Ourselves is the first part of a three part practical discipleship programme The God Who is There Designed to be accessible to those with no church background Beyond Ourselves invites participants Christian and not yet Christian to discover together what it means to develop a living relationship with God Topics covered include creation suffering life after death the life and resurrection of Jesus and the gift of the Holy Spirit The God Who is There is a response to the increasingly voiced need for simple interactive and relational discipleship material It is commended by the Anglican Communion

**Beyond Ourselves** Patricia J. Romero, 2014-10-30 The War Between the States was a particularly difficult time for those who lived in the South especially those in the Shenandoah Valley of Virginia who quickly became witnesses to many battles and other ravages of that awful conflict Among those who were beginning to wonder how they could endure all of this was Julia Claiborne who held great concern for her family and almost daily had to fight off the fear of losing that which had become a big part of herself their beloved ancestral plantation Beulah Land

**The Shift: The Journey Beyond Yourself** Bishop J. Faraja Kafela, *The Spontaneous Brain* Georg Northoff, 2018-10-09 An argument for a Copernican revolution in our consideration of mental features a shift in which the world brain problem supersedes the mind body problem Philosophers have long debated the mind body problem whether to attribute such mental features as consciousness to mind or to body Meanwhile neuroscientists search for empirical answers seeking neural correlates for consciousness self and free will In this book Georg Northoff does not propose new solutions to the mind body problem instead he questions the problem itself arguing that it is an empirically ontologically and conceptually implausible way to address the existence and reality of mental features We are better off he contends by addressing consciousness and other mental features in terms of the relationship between world and brain philosophers should consider the world brain problem rather than the mind body problem This calls for a Copernican shift in vantage point from within the mind or brain to beyond the brain in our consideration of mental features Northoff a neuroscientist psychiatrist and philosopher explains that empirical evidence suggests that the brain s spontaneous activity and its spatiotemporal structure are central to aligning and integrating the brain within the world This spatiotemporal structure allows the brain to extend beyond itself into body and world creating the world brain relation that is central to mental features Northoff makes his argument in empirical

ontological and epistemic methodological terms He discusses current models of the brain and applies these models to recent data on neuronal features underlying consciousness and proposes the world brain relation as the ontological predisposition for consciousness
