Wings of a Raven, 2028AD Mike Koontz, 2017-08-09 *2028AD* is a real life inspired sci fi universe stretching across several books and stand alone short stories depicting life on Earth and beyond as our wasteful life takes the human species and planet Earth beyond the gates of man made Ragnarök. While the Universe is large and the stories go far beyond Earth and the mundane, the first book tells a small and fairly short everyday life story about a few individual people and their contemporary life a decade or so from now as we follow their tiny little footprints of thoughts and love, fear, despair, melancholy, laughter, and needs in that whirlwind of life in the Anthropocene which we too inhabit. They had departed drifting through the high seas, Ragnarök 5 was their designation but the wolfpack of ships was scattered and silence was all that remained from the outside world.

Ash Edward Parker, 2021-05-19 *Ash* is a beautifully illustrated account of the botanical and cultural faces of the ash tree. The book maps the tree's evolution and geographical spread across the entire Northern Hemisphere over the last 44 million years and describes the 43 species that grace the planet today. Edward Parker also explores the botany, cultural history, and medicinal uses of the tree from its significance in ancient Indo-European cultures to its remarkable properties in treating Alzheimer's disease. In addition, he looks at topical issues such as the devastating effects that the spread of the emerald ash borer beetle and the ash dieback fungal infection are having on Northern Hemisphere forests.
