Beyond Science The Wider Human Context:

Beyond Science J. C. Polkinghorne, John Polkinghorne, 1998-09-17 John Polkinghorne examines the nature of scientific inquiry itself and the human context in which science operates

The Future of Reason, Science and Faith J. Andrew Kirk, 2016-12-05 Focusing on the history of ideas this book explores important questions concerning knowledge in relation to philosophy science ethics and Christian faith Kirk contributes to the current debate about the intellectual basis and integrity of Western culture exploring controversial issues concerning the notions of modernity and post modernity Repositioning the Christian faith as a valid dialogue partner with contemporary secular movements in philosophy and ethics Kirk seeks to show that in post Christian Europe the Christian faith still possesses intellectual resources worthy to be reckoned with This book's principal argument is that contemporary Western society faces a cultural crisis It explores what appears to be an historical enigma namely the question of why Western intellectual endeavours in philosophy and science seem to have abandoned the search for a source of knowledge able to draw together disparate pieces of information provided by different disciplines Kirk draws conclusions particularly in the area of ethical decision making from this apparent failure and invites readers to consider Christian theism afresh as a means for the renewal of culture and society

Weighing Interpretations in Science, Biblical Studies, and Life Matthew B. Joss, 2023-06-05 Conflicting narratives beat upon us everywhere in politics religion and even science One person's conspiracy theory seems to be another's self evident truth But how are we to decide what makes one interpretation of the world better than another Weighing Interpretations in Science Biblical Studies and Life The Quest for the Best Explanation argues that theories and interpretations are trying to explain the world and hence the better theory is the one that better explains the data of the world But this raises questions What is an explanation How are we to rank them What kind of inference allows us to find and reason about these explanations This book provides a full description of this Inference to Best Explanation IBE and shows how IBE is at work in science Biblical studies and even everyday life Matthew B Joss offers a new method of diagramming and weighing explanatory arguments for competing interpretations In particular the book focuses on Biblical studies showing how this method can help in assessing and dialoging about interpretations walking through case studies in detail Finally the book concludes by gesturing towards some theological implications of IBE Namely IBE lends itself to a bottom up way of theologizing that is consistent with core Christian doctrines

State of Affairs Richard J. Coleman, 2014-10-24 The last sixty years have witnessed a virtual explosion of interest in how modern science and traditional Christianity intersect This new rapprochement with science has irrevocably altered how we think of God It constitutes a foundation from which we cannot retreat but from which we also cannot move forward until we examine the presumptions on which it is based For the first time Richard Coleman interprets in a clear and meaningful way the themes and practitioners that make this rapprochement different and what it has achieved But this book is more than description it is an inquiry into whether Christian theology has lost its authentic voice by its

singular focus on accommodating modern science Perspectives on Science and Christian Faith ,2004 *From Physicist to Priest* J. C. Polkinghorne,2007 This is an autobiography of this well known author with a unique perspective arising from his roles as both a theologian and a physicist It tells the story of his journeys into both disciplines from a human angle including the formative experiences and key relationships he experienced as a child an undergraduate graduate and beyond into university teaching priesthood and writing He describes his developing thoughts and understanding of the value and interdependence of each of the major disciplines and by so doing brings a human touch to the big questions that each approach raises Science and Environmental Decision Making Mark Huxham,David Sumner,2000 Science is vital in informing the increasingly urgent and complex environmental decisions that affect all our lives from international agreements on action to limit climate change to decisions on growing genetically modified crops It is clear however that many environmental decisions are taken in the face of scientific uncertainty or ignorance and involve questions of politics and ethics that go beyond science Science alone cannot answers such questions as Are the risks of nuclear power acceptable and Why should we conserve wild species Science and Environmental Decision Making explores the use and limitations of science in helping to answer environmental questions emphasising the importance of ethics politics and sociology in the decision making process Starting with the question What is meant by a scientific explanation the first three chapters provide a simple introduction to the philosophy and sociology of science and the importance of these fields to environmental scientists They explain the logic of testing ideas in science and look at some of the absolute limits of scientific explanation showing how value judgements inevitably influence scientific work before exploring commercial and political influences on science Chapters 4 10 show how these themes are relevant in case studies ranging from genetic engineering in agriculture to conservation marine eutrophication and the use of models and radiation protection Each chapter is written by a researcher active in the area and begins with an editorial introduction highlighting the major themes illustrated by the case study This book is aimed at students of ecology environmental science environmental management and geography It will also be useful reading for sociology students who study how the science is applied **The humanities in the new millennium** Susanne Peters,Michael Denis Biddiss,Ian Frank Roe,2000 **Current Literature on Science of Science** ,1997 Research Design in Clinical Psychology Alan E. Kazdin,1998 With an emphasis on clinical psychology the author explains methodology and research design The book is relevant to related fields since it includes methos of conducting research as well as practices procedures and designs for developing a broad base of knowledge *Current Contents* Institute for Scientific Information (Philadelphia),1997 **Scientific Pioneers** Joyce Tang,2006-02-16 This book critically examines the career development of female scientific pioneers Drawing from existing biographical and ethnographical data author Joyce Tang analyzes the life and career histories of ten extraordinary female scientists Marie Curie Irene Joliot Curie Margaret Mead Barbara McClintock Maria Goeppert Meyer Rachel Carson Rita Levi Montalcini Dorothy Hodgkin Rosalyn Yalow and Fay Ajzenberg Selove The

author explores the personal political cultural and economic factors that led to the success of these women Scientific Pioneers proposes that for a woman to be successful in science not only requires perseverance and talent but also structural opportunities institutional support and conscious decision making Scientific Pioneers is an important addition to the growing literature about women in science the sociology of science and the dynamics of discrimination This analysis of female scientific pioneers is an invaluable resource for both public policy debates and research on inequality *The Enigma of Energy* Vidette Todaro-Franceschi,1999 For anyone who asks What is life Why are we here Is there a purpose in the universe The author demonstrates that energy is the unifying force that binds us together with one another and with the Designer of the universe **American Scientist** ,1996 RILA ,2011 **Science Vs. Religion** David Turell,2004 Science vs Religion shows that the scientific discoveries of the past 150 years prove God exists beyond a reasonable doubt Our universe is carefully designed to allow life and human development The universe started with a Big Bang the beginning of space and time There is no before before the Bang and science does not know what caused it Darwin s Theory of Evolution appears to do away with God but there is enormous controversy among Darwin scientists as to how evolution works Other scientists raise critical objections Darwinism is not proven Scientists don t know how life got started because living matter even single celled forms have been found to be extremely complex This book proposes for those who have faith in God and for those who have chosen not to accept God on faith if they study scientific discoveries they will find overwhelming evidence of the Hand of God Quill & Quire ,1996 **Anthropology and Theology** Frank A. Salamone,2000-09-20 Anthropology and Theology is a stimulating exploration of the anthropology of theology a new field of research that is still being shaped and defined This follow up to Explorations in Anthropology and Theology includes contributions by theologians most notably Mark Taylor Together the contributing anthropologists and theologians delve into the world of indigenous religious systems treating them with the respect and attention that is usually given only to the major world religions The topics covered include American secular rituals feminist spirituality the impact of modernization on traditional religions alternative approaches to the sacred and implications for field work Most of the major ethnographic areas of the world are represented including Africa Asia Latin America Europe the Arctic and the United States This collection of works is indispensable as a source that addresses the relevance of theology and anthropology to one another Recommended for various courses in theology anthropology of religion symbolic anthropology and field work **Religion, Science, and Non-science** William Sweet,2003

Organizational Learning and Communities of Practice in a High-tech Manufacturing Firm Anthony M. Barrett,2005 This work uses an ethnographic study as the backdrop to address theoretical and philosophical concepts related to organizational learning and social learning theory To frame the rationale for this research the ramifications of modern interpretive and postmodern traditions of organizational studies are considered The social character of knowledge and human life is seminal to understanding how an organization learns
