Šimon Jůn, COO at Dotidot, longtime Figma lecturer and organizer of the Czech Friends of Figma community built this book from the trenches of real product work. After years of untangling messy files, rescuing failing handoffs and coaching teams at scale he distilled what actually works into a practical recipe driven guide. Over time Šimon saw the same problems show up again and again: bloated files, broken handoffs and design systems that couldn't scale. This book is his way of sharing the patterns, tools and habits that helped teams move past those roadblocks and build stronger, more connected design processes in Figma. Inside you'll learn how to structure files for real collaboration, use design tokens without chaos, build accessible, scalable libraries and hand off to developers with confidence. You'll see how to automate repetitive work with plugins and AI, run async reviews and bake feedback loops into your process so projects keep moving without losing polish.
