Carbohydrate Modifications In Antisense Research:

Carbohydrate Modifications in Antisense Research Yogesh S. Sanghvi, American Chemical Society. Meeting, 1994 Reviews recent developments and progress in the carbohydrate related chemistry of novel nucleic acid mimics and their applications in antisense therapeutics Discusses the use of new chemical classes to rationally design and synthesize oligonucleotides Explores several carbohydrate modifications of the oligonucleotide to stabilize against nuclease degradation and to enhance the binding affinity for a given target Suggests future directions of carbohydrate related modifications for antisense molecules

Carbohydrate Modifications in Antisense Research Yogesh S. Sanghvi, P. Dan Cook, 1994 Drug Delivery Systems in Cancer Therapy Dennis M. Brown, 2003-09-08 Leading experts survey the currently available technologies designed to improve the delivery of today's cancer chemotherapeutic agents The authors review both the theoretical and practical considerations governing conventional and nonconventional methods of drug administration and identify promising opportunities for product development In their outline and discussion of the use of novel formulation technologies including synthetic polymers and biomaterials for prolonged or sustained drug release to achieve potentially greater therapeutic effect they profile those technologies that have resulted in a number of approved and late stage clinical products Biotechnology

and aspects of molecular biology Derek H. R. Barton, Kōji Nakanishi, Otto Meth-Cohn, 1999 Hardbound This volume is intended to cover the chemistry of one of the most widely studied and important natural products DNA Discussed in detail are physicochemical properties of the molecule itself as well as small molecule natural products that are known to interact with it Also included are methods to synthesize and manipulate DNA and modified analogues Twenty chapters are devoted to this overall topic The first five relate to the structure of DNA the first focuses on thermodynamics and kinetics of double helix formation the next two describe triple and tetra helical structures formed by DNA and the last two focus on methods for probing DNA structure specifically NMR methods and chemical probing methods respectively Chapters 6-12 focus on the chemistry of natural DNA and modified analogues The first of these addresses nonenzymatic methods for synthesizing DNA and the next chapter on methods for attachment of reporter groups t

Carbohydrate Mimics Yves Chapleur, 1998-09-10 Carbohydrate Mimics Concepts and Methods Edited by Yves Chapleur Apart from the various functions of carbohydrates in natural processes they are important building blocks for drugs especially antibiotics In addition carbohydrates are considered as important structures in the immunological recognition process of the antigen antibody reaction The modification of the structure and thereby the chemistry of substrates is a common procedure in nature This naturally occurring process is reflected in the concept of molecular mimicry which has become a useful approach in drug discovery The search for carbohydrate analogues that exhibit better binding activity biological activity and stability began with the synthesis of azasugars A lot of structural modifications around the anomeric center of carbohydrates has been achieved over the last decade and these are summarized in terms of the different chemical and biological aspects of carbohydrate mimics in one part of this book In addition to the well established fields of C glycosides azasugars and carbasugars the other part of the book focusses on outstanding achievements in carbohydrate mimic research Everybody who is active in carbohydrate research or is interested in moving into this exciting field will benefit from this up to date source of informations The leading experts in this field describe their scientific approaches to real interdisciplinary puzzles This book should be an inspiration to scientists in organic medicinal chemistry biochemistry and biology
