The Care and Feeding of Children L. Emmett Holt,2015-06-16 Excerpt from The Care and Feeding of Children A Catechism for the Use of Mothers and Children s Nurses The constant use of the Catechism as a manual for nursery maids has shown the need of fuller treatment of several subjects than was given in the earlier editions An attempt has been made to meet the needs of mothers and nurses outside of institutions who have made the book a nursery guide especially in matters relating to older children The chapters upon infant feeding have been largely rewritten and it is hoped simplified for the average reader Some further details relating to infants whose nutrition is difficult have been introduced although the scope of the book makes this part necessarily brief The author s aim has been not to alarm the mother by acquainting her with all the possible diseases and accidents which may befall her child but to open her eyes to matters which are her direct and chief concern About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
