Career Alternative:

The Educator's Guide to Alternative Jobs & Careers Ronald L. Krannich,1991 Careers of educators quickly plateau after only a few years in teaching or administration Often facing low salaries and encountering career disappointments many educators wish to explore new career opportunities outside education that will more fully use their many skills and enable them to pursue new career and monetary interests Thousands of educators can and do make satisfying career changes each year Here is the definitive guide for preparing educators at all levels for new careers Specifying the career problems of educators and outlining numerous myths that prevent many from taking effective action *Alternative Careers for Lawyers* Hillary Jane Mantis,1997 Rethinking your career strategy Suggestions for nonlegal careers Advice for dealing with the financial ramifications of leaving the practice of law Real life success stories Lawyers have the highest depression rates highest pressure lowest popularity ratings and the longest hours of almost any profession that exists No wonder that according to a recent poll 70% of lawyers surveyed said they would start a new career if they could If you are disillusioned by the realities of law practice or want to get into a different type of law then you can start a new career In *Alternative Careers for Lawyers* you will hear from many people who managed successful transitions one of them is an NBC news anchor another started her own bicycle tours company and yet another built a 20 million attorney temp agency We will show you how to manage every step of this uncertain yet ultimately liberating process Deciding whether to change careers or just switch jobs Choosing which new careers to pursue Re tailoring your resume for non legal careers like education consulting publishing and sales and marketing Networking interviewing furthering your education and more **Alternative Careers for Teachers** Sandy Pollack,1979 **A Phenomenology of Career Change in the Malaysian Workforce** Jennifer Yee Quan Tham,Yit Sean Chong,Pervaiz K. Ahmed,2023-07-25 Evolution in economy technology and social institutions over time have given rise to boundaryless and Protean careers that promote mobility and self direction in managing one's career This has led to the phenomenon of career change whereby individuals undertake a shift from one field of work to a completely different field of work In career change research career changers have been studied as a collective singular group undergoing a similar change experience which neglects individual differences that may contrast the experience of change from one changer to another Furthermore the emotional experience that accompanies a career change has been examined with a primary focus on the role of positive emotions which overlooks the role of negative emotions in career change Thus this book sheds light on three key narratives of career change Rejectors Navigators and Seekers that were identified in a phenomenological study of career change amongst Malaysian working adults Semi structured interviews were conducted with 30 career changers across age gender and ethnicity with a focus on how they made sense and meaning of their lived experience of career change within their environment and context Each career change narrative was found to have different characteristics motivations and behaviors respectively which shaped their unique career change process Negative emotions

were also revealed as key drivers of the career change process although each narrative expressed different types of negative emotions Finally the book also introduces an adaptive perspective to career development by way of the Adaptive Career Construal Model ACCM which was proposed based on the continuous bi directional relationship between career decisions and career outcomes
