The Caring Economy Anthony J. Culyer, 1979 **The Oxford Handbook of Ethics and Economics** Mark D. White, 2019-06-06 Economics and ethics are both valuable tools for analyzing the behavior and actions of human beings and institutions Adam Smith the father of modern economics considered them two sides of the same coin but since economics was formalized and mathematicised in the late 1800s and early 1900s the fields have largely followed separate paths The Oxford Handbook of Ethics and Economics provides a timely and thorough survey of the various ways ethics can do and should inform economic theory and practice The first part of the book Foundations explores how the most prominent schools of moral philosophy relate to economics asks how morals relevant to economic behavior may have evolved and explains how various approaches to economics incorporate ethics into their work The second part Applications looks at the ethics of commerce finance and markets uncovers the moral dilemmas involved with making decisions regarding social welfare risk and harm to others and explores how ethics is relevant to major topics within economics such as health care and the environment With esteemed contributors from economics and philosophy The Oxford Handbook of Ethics and Economics is a resource for scholars in both disciplines and those in related fields It highlights the close relationship between ethics and economics in the past while and lays a foundation for further integration going forward

Jochimsen, 2013-04-17 Much like their authors the ideas behind books can grow and change on the way from proposal to manuscript I originally planned to join the discussion on care and economics at a different more policy oriented level hoping to identify the conditions under which caring services are taken to the market In approaching the task however I realized that economic science lacked an overall concept of caring

Economists notions of caring and their knowledge of its basic elements and structural characteristics were fragmented Caring activities were treated in the context of household work unpaid work or subsistence and informal work None of the different approaches shared a common frame of reference This has made it impossible to study caring activities across the various realms of the economy independent of whether provided in a family setting purchased on the market or supplied by the state or society I therefore found I had to begin my questioning earlier at the level of basic understandings and concepts
