Creative Society: Prospects for India Pradip N. Khandwalla, 2014 Creativity is one of mankind's principal resources. Can this resource be harnessed to accelerate India's transition from traditionalism to modernity and widespread poverty to decent living standards for all? Can India's creative efflorescence be directed towards designing a society that facilitates well-being, boosts cultural evolution and raises the bar for exhilaration through creative achievement? Is it possible to socially engineer a society that throbs with questions, novel perspectives and relevant innovations? Can it lead to a society where millions question the status quo and join hands to work out innovative solutions in short a creative society? This book is an affirmative response to these questions. Creative Society is an intellectually stimulating analysis of factors that trigger the emergence of a truly creative and innovative society; it explores the nature of human creativity, how it can be augmented and the social contexts that shape it; discusses ways of making institutions such as the government, educational bodies and other civil society organizations more creativity friendly; offers an assessment of India's prospective emergence as a highly vibrant, dynamic and creative society; and finally offers several practical suggestions for India's creative efflorescence. *The Cosmo-Creative Society* Ake E. Andersson, David F. Batten, Kiyoshi Kobayashi, Kazuhiro Yoshikawa, 2012-12-06 Today telecommunication systems are expanding and evolving at a remarkable rate with the aid of fiber optics, satellites and computerized switchboard systems. Airline systems are providing faster and more efficient networks for world-wide human transportation. Computers are now generally accessible to virtually all industries and many households. But perhaps the most important factor is that education systems are expanding the knowledge base for city populations, thus resulting in increased efficiency in the use of computers, telecommunications and rapid transportation systems. The revolutionary age of logistical networks is upon us. Logistical networks are those systems which facilitate the movement of knowledge, commodities, money and people in association with the production or consumption of goods and services. Logistical networks form a set of important infrastructure which serve as hard and soft means to sustain all kinds of movement, transactions and diffusion within and between global networks of cities. Major structural changes in the regional and urban economy, culture and institutions are triggered by slow but steady changes in global logistical systems. **The ...
