Nicky Waller,2017-09-07 A Creative Approach to Teaching Science is filled with exciting and innovative ways to teach and meet the objectives for primary physics chemistry and biology from Years 1 6 Each idea has been tried and tested used in the classroom with children of the relevant age range and all are deep rooted in practical enquiry with clear links to the statutory requirements for primary science This book is jam packed full of strategies and ready made ideas with a creative edge aimed at engaging children and encouraging them to think critically and scientifically and to consider key scientific topics in real life scenarios This book is a must have for teachers looking to inspire their pupils and making sure they have fun along the way

Teaching Science Through Discovery Arthur A. Carin,1985 The eighth edition of Teaching Science Through Discovery has been extensively revised not only to inform the reader of sweeping reforms in science education but also to provide some perspective and strategies to initiate these reforms in science classrooms

The Future of Science in Elementary Schools Senta A. Raizen,Arie M. Michelsohn,1994-02-09 Scientific literacy depends upon children s early engagement in science It is in the elementary school years that teachers have an opportunity to cultivate and nourish their students innate curiosity about the world Well taught science classes help give students the skills to investigate problems logically and systematically and make informed decisions based on evidence skills that can serve young people the rest of their lives Unfortunately many teachers are ill prepared to teach these classes Drawing on the knowledge and experience of a panel of leaders in elementary education and in science education and the results of a survey of 142 teacher education programs editors Senta A Raizen and Arie M Michelsohn offer a new vision for preparing prospective teachers of grades K through six in science content and pedagogy a vision that will transform teachers from people who merely pass on someone else s knowledge to creative facilitators of children s learning through involvement in the process of science investigation The authors include a three part interchangeable model for preparing teachers in science and they outline the basics of what prospective elementary school teachers need to learn in science courses and in science pedagogy courses including fundamental underlying concepts habits of mind and effective instructional strategies The recommended courses and programs will arm teachers with powerful tools necessary for a true understanding of science learning in children
