Creativity And Divergent Thinking A Task Specific Approach:

Creativity and Divergent Thinking John Baer,2014-01-09 Do general purpose creative thinking skills skills like divergent thinking which is touted as an important component of creative thinking no matter what the task domain actually make much of a contribution to creative performance Although much recent research argues against such domain transcending skills including several new studies reported in this book the appeal of such general skills remains strong probably because of the theoretical economy and power such skills would provide Divergent thinking in particular has had an incredible staying power Despite its many flaws divergent thinking remains the most frequently used indicator of creativity in both creativity research and educational practice and divergent thinking theory has a strong hold on everyday conceptions of what it means to be creative Reviewing the available research on divergent thinking this book presents a framework for understanding other major theories of creativity including Mednick s associative theory and a possible connectionist approach of creativity It reports a series of studies including the study that won APA s 1992 Berlyne Prize that demonstrate the absence of effects of general creative thinking skills across a range of creativity relevant tasks but indicate that training in divergent thinking does in fact improve creative performance across diverse task domains The book then ties these findings together with a multi level theory in which a task specific approach to creativity is strengthened by recasting some divergent thinking concepts into domain and task specific forms This book fills the gap between divergent thinking theory and more recent modular conceptions of creativity Rather than advocate that we simply discard divergent thinking an approach that hasn t worked or at least hasn t happened because of many attacks on its validity and usefulness this book shows how to separate what is useful in divergent thinking theory and practice from what is not It shows that divergent thinking training can be valuable although often not for the reasons trainers think it works And it offers specific suggestions about the kinds of creativity research most needed today

Domain Specificity of Creativity John Baer,2015-11-06 Recent research findings have challenged the idea that creativity is domain general Domain Specificity of Creativity brings together the research information on domain specificity in creativity both the research that supports it and answers to research arguments that might seem to challenge it The implications for domain specificity affect how we move forward with theories of creativity testing for creativity and teaching for creativity The book outlines what these changes are and how creativity research and applications of that research will change in light of these new findings Summarizes research regarding domain specificity in creativity Outlines implications of these findings for creativity theory testing and teaching Identifies unanswered questions and new research opportunities

Creative Contradictions in Education Ronald A. Beghetto,Bharath Sriraman,2016-09-30 Creative Contradictions

in Education is a provocative collection of essays by international experts who tackle difficult questions about creativity in education from a cross disciplinary perspective The contributors to this volume examine and provide fresh insights into the tensions and contradictions that researchers and educators face when attempting to understand and apply creativity in educational contexts Creativity in education is surrounded by many contradictions Teachers generally value creativity but question the role it can and should play in their classroom Many educators find themselves feeling caught between the push to promote students creative thinking skills and the pull to meet external curricular mandates increased performance monitoring and various other curricular constraints This book brings together leading experts who provide fresh cross disciplinary insights into how creative contradictions in education might be addressed Contributors will draw from existing empirical and theoretical work but push beyond what currently is and comment on future possibilities This includes challenging the orthodoxy of traditional conceptions of creativity in education or making a case for maintaining particular orthodoxies

Creativity and Mental Imagery Massimiliano Palmiero, Laura Piccardi, Raffaella Nori, Liana Palermo, Carola Salvi, Cecilia Guariglia, 2016-10-18 Creativity is increasingly attracting attention of scientific community given its role in different aspects of human life So far we have only begun to understand its complexity and how it correlates with other cognitive processes A further understanding of its key processes is essential to better implement applications of creativity tools to daily life Therefore it is the aim of this Research Topics to further elucidate how creativity can be measured and its components such as mental imagery are determined

Creatively Gifted Students are not like Other Gifted Students Kyung Hee Kim, James C. Kaufman, John Baer, Bharath Sriraman, 2013-04-20 This book focuses on the needs of creatively gifted students and how schools can meet those needs Creatively gifted students show exceptional levels of creativity These students may or may not have developed other talents and abilities yet Even when their abilities and talents are apparent the needs of creatively gifted students may not be recognized by current gifted education programs Regardless of whether a creatively gifted student is included in these programs schools often inadvertently ignore their special needs The goal of this book is to share the newest research about the attributes and needs of creatively gifted students and the kinds of programs that best address those special needs The overarching goal of this book is to share with scholars educators and practitioners the latest research on creatively gifted students and the kinds of programs that best meet the unique needs of these students Through the knowledge and experiences shared here we hope to help close the gap between what these children need and what they are getting
