CREATIVITY AND INTUITION

THE UNFAILING INTUITION of a great master is apparent in these stimulating and highly original autobiographical writings. They reveal the mind of a man thoroughly versed in the classics of China and Japan; a man who has become one of the twentieth century's most brilliant scientists.

Einstein said once that the most incomprehensible fact is the fact that nature is comprehensible. *Creativity and Intuition* deals with this miracle—through which human thinking is capable of penetrating into the inner workings of nature. One aspect of the miracle is that nature is equally comprehensible to any scientifically trained human being, whatever his or her origin or cultural background.

The Western reader will find it of special interest to learn the urges and motivations that brought an eminent Japanese scientist to physics, his thoughts about science, his approaches to problems, and the way his scientific life is rooted in the philosophies of his culture.

Dr. Yukawa searches for the sources of genius and gives us a wonderful description of creativity. He is deeply concerned about the present state of modern physics. He pleads for a return to the attitudes of Laotse and his followers, who taught that the human race is just one part of nature, and questions the Western attempt to dominate the physical world.

Dr. Yukawa is among the most outspoken scientists who have used their influence and reputation for a world of peace among nations and against the misuse of science in war. The articles and essays in this book bear witness to the depth of his feelings and to the force of his words.
