Criminal Interrogation Laws And Tactics:

The Psychology and Law of Criminal Justice Processes Roger J. R. Levesque, 2006 Psychological science now reveals much about the law's response to crime. This is the first text to bridge both fields as it presents psychological research and theory relevant to each phase of criminal justice processes. The materials are divided into three parts that follow a comprehensive introduction. The introduction analyses the major legal themes and values that guide criminal justice processes and points to the many psychological issues they raise. Part I examines how the legal system investigates and apprehends criminal suspects. Topics range from the identification, searching, and seizing to the questioning of suspects. Part II focuses on how the legal system establishes guilt. To do so, it centres on the process of bargaining and pleading cases, assembling juries, providing expert witnesses, and considering defendants' mental states. Part III focuses on the disposition of cases. Namely, that part highlights the process of sentencing, defendants' predicting criminal tendencies, treating and controlling offenders, and determining eligibility for such extreme punishments as the death penalty. The format seeks to give readers a feeling for the entire criminal justice process and for the role psychological science has and can play in it. *The Journal of Criminal Law, Criminology, and Police Science*, 1967

Criminal Interrogation Devallis Rutledge, 1994 Rutledge combines the legal analysis of a prosecuting attorney with the practical experience of a former police officer. He offers dozens of tactical tips in plain talk. Criminal Interrogation covers every aspect of Miranda. Rutledge makes sense of Supreme Court decision issues while convincingly dispelling many Miranda myths that have haunted officers for years. This text is an excellent supplemental reader to expand on the topic of interrogation. Your students will come away with a superior understanding of this difficult art.

Psychological Science and the Law Neil Brewer, Amy Bradfield Douglass, 2019-03-05 Psychological research can provide constructive explanations of key problems in the criminal justice system and can help generate solutions. This state-of-the-art text dissects the psychological processes associated with fundamental legal questions: Is a suspect lying? Will an incarcerated individual be dangerous in the future? Is an eyewitness accurate? How can false memories be implanted? How do juries, experts, forensic examiners, and judges make decisions, and how can racial and other forms of bias be minimized? Chapters offer up-to-date reviews of relevant theory, experimental methods, and empirical findings. Specific
