**Innovation and Entrepreneurship** Peter Drucker, 2014-09-15 How can management be developed to create the greatest wealth for society as a whole This is the question Peter Drucker sets out to answer in Innovation and Entrepreneurship A brilliant mould breaking attack on management orthodoxy it is one of Drucker's most important books offering an excellent overview of some of his main ideas He argues that what defines an entrepreneur is their attitude to change the entrepreneur always searches for change responds to it and exploits it as an opportunity To exploit change according to Drucker is to innovate Stressing the importance of low tech entrepreneurship the challenge of balancing technological possibilities with limited resources and the organisation as a learning organism he concludes with a vision of an entrepreneurial society where individuals increasingly

take responsibility for their own learning and careers With a new foreword by Joseph Maciariello      **Reconciling Art and Technology** Subrata Dasgupta,2024-05-14 This book examines two venerable cultures art and technology and uses the young interdisciplinary of cognitive history combined with case studies of both ancient and modern artifacts to explore and unveil some of the bridges by which this reconciliation of two seemingly distant and oppositional cultures can be effected Art and technology are commonly regarded as oppositional While both are concerned with made things artifacts and both have their origins in pre literate antiquity the primary purposes they are intended for are quite distinct the artifacts of technology serve utilitarian purposes while those of art serve affective needs This opposition between art and technology notably argued by such scholars as Lewis Mumford and George Kubler is challenged in this book For when we consider art and technology as creative phenomena then many significant interesting and often subtle commonalities emerge whereby a reconciliation a unity of these two great cultures seems possible This book utilizes case studies of both ancient and modern artifacts ranging from the Nataraja sculpture of ancient India a great astronomical clock of ancient China and Japanese Samurai swordmaking through Gothic cathedrals and Renaissance paintings of Europe to English Elizabethan machinery to the French Impressionists to modernist concrete structures and paintings in both East and West This book will be of interest to students and professional scholars interested in the histories of art and technology cultural history and creativity studies
