Teach Yourself Creative Writing Michael LaRocca, 2012-02-26 Can you learn creative writing I don't believe that creativity can be taught Either you're born with it or you're not That's gotta make you wonder why I taught Creative Writing to literally thousands of students mostly in classrooms or why Creative Writing classes exist at all It's because the craft of writing can be studied and learned If you have that innate creativity that's wonderful But you've got to bring that out Creation remains mystical but craft is learned and honed by many hours of hard work If you have something that you need to express and the act of expressing it is agony that's just not right We want the act of self-expression to become as easy and as natural as possible How do we do that Practice That's the only way Write constantly Write thousands of words for years and years knowing it's okay if most of them suck Mine sure did To distill what you think feel and believe from all the trash floating around in your head and then to actually put that on paper the way you mean to put it is a skill that only comes from years of practice They don't teach it in any school I've ever been to I struggled at this for 20 years or so after I graduated from college That's how I learned to write Not in a classroom It doesn't matter if you've got a project going or a dozen or nothing at all These are the skills that you will use the first time you face the blank page or the hundredth You're a reading junkie aren't you I think you have to be If you want to write you must read If you don't love reading you can't create something that others will love reading If you don't love reading then writing isn't for you It's not about writing because you want to say I am a writer It's about writing because you love writing And reading In your lifetime of reading you've been unconsciously internalizing the rules of great writing That's what you want To internalize First we study rulebooks perhaps take some classes and conclude just about everything we're doing is wrong So many rules to memorize We might dread sitting down to write with all those constraints But really it's not about memorizing rules at all It's about internalizing the rules following them or not if you prefer without being consciously aware of what they are

They're there but in the background Your story is what matters You're supposed to be having fun not working At least not during the creation phase Study rules learn rules memorize rules there's one more step Internalize rules Well actually there's another step after that Break rules But do it deliberately not out of ignorance In the process of all this work you'll find your own unique writing voice Without that there's no point in writing at all
