Health and Happiness in 20th-century Avant-garde Art Donald Burton Kuspit, Lynn Gamwell, State University of New York at Binghamton. Art Museum, 1996. This book presents a refreshing new approach to avant-garde art by demonstrating that a genuine core of modernism manifests a positive life-affirming attitude. Donald Kuspit and Lynn Gamwell challenge the assumption that disintegration and negativity provide the most authentic artistic responses to this century's gloomy zeitgeist. Lavishly illustrated, their book includes colorful images of paintings, sculptures, and decorative arts, as well as photographs of spectacular gardens.

A Companion to Aesthetics Stephen Davies, Kathleen Marie Higgins, Robert Hopkins, Robert Stecker, David E. Cooper, 2009-04-27. A COMPANION TO AESTHETICS. This second edition of *A Companion to Aesthetics* examines questions that were among the earliest discussed by ancient philosophers such as the nature of beauty and the relation between morality and art, while also addressing a host of new issues prompted by recent developments in the arts and in philosophy, including coverage of non-Western art traditions and of everyday and environmental aesthetics. The volume also canvases debates regarding the nature of representation, the relation between art and truth, and the criteria for interpretation, which are among the most hotly discussed topics in contemporary philosophy. In this extensively revised and updated edition, 168 alphabetically arranged articles provide comprehensive treatment of the main topics and writers in aesthetics. Major additions include historical overviews from the prehistoric to the present and a section on the individual arts. *A Companion to Aesthetics* will serve students of philosophy, literary criticism, and cultural studies, as well as the educated general reader, both as a work of reference and with its many substantial essays as a guide to the best thinking about the arts from the ancient Greeks to the dawn of the twenty-first century.

Creative Contradictions in Education Ronald A. Beghetto, Bharath Sriraman, 2016-09-30. *Creative Contradictions in Education* is a provocative collection of essays by international experts who tackle difficult questions about creativity in education from a cross-disciplinary perspective. The contributors to this volume examine and provide fresh insights into the tensions and contradictions that researchers and educators face when attempting to understand and apply creativity in educational contexts. Creativity in education is surrounded by many contradictions. Teachers generally value creativity but question the role it can and should play in their classroom. Many educators find themselves feeling caught between the push to promote students' creative thinking skills and the pull to meet external curricular mandates, increased performance monitoring, and various other curricular constraints. This book brings together leading experts who provide fresh cross-

disciplinary insights into how creative contradictions in education might be addressed Contributors will draw from existing empirical and theoretical work but push beyond what currently is and comment on future possibilities This includes challenging the orthodoxy of traditional conceptions of creativity in education or making a case for maintaining particular orthodoxies
