Creativity From Constraint The Psychology Of Breakthrough:

Creativity from Constraints Patricia D. Stokes, 2005-08-17 In this exciting new contribution to the study of creativity psychologist artist and writer Dr Patricia Stokes delves into the minds of famous creative artists and discovers the surprising source leading to their creative breakthroughs From Picasso to Stravinsky Kundera and Chanel to Frank Lloyd Wright it is not boundary less creative freedom that inspires new ideas but self imposed well considered constraints Monet forced himself to repeatedly paint the way light broke on between and around his subjects contrasting color instead of light and dark and softening edges in the process His constraints catapulted the art world from representational to impressionist art Whatever your creative field be you an artist educator or psychologist who studies creativity and problem solving Stokes shows you how to think clearly about your creative development and design the vital constraints that will take you to breakthrough

Creativity from Constraints in the Performing Arts, 2016-01-19 This book was written to be useful To be a tool for creators and performers One tool is in your head You will learn many new things You will learn that creativity is a problem solving process How creators and performers in dance improv opera jazz musicals drama comedy and circus use paired constraints to solve their creativity problems How one of each constraint pair precludes something in an existing style or solution How the other provides a substitute to replace it How constraint pairs cascade one substitution suggesting another How a series of substitutions becomes a solution path that replaces the old and defines the new The other tool in your hands you will learn how to make your tool box bigger How to get past the gatekeepers How to use paired constraints to start doing something new How to use paired constraints to continue doing something new Use your new tools Use them to do something new

Using Paired Constraints to Solve The Innovation Problem Patricia D. Stokes, Michael Gibbert, 2019-10-18 This book defines innovation as both a problem and a problem solving process It allows readers to approach innovation as a straight forward problem solving process and teaches them the paired constraint process to solve specific innovation problems The authors have used their experience working in creative industries combined with their academic perspective to create a formal teachable tool for solving innovation problems This consists of a formal structure the problem space a functional strategy the paired constraints and process solution by substitution This book provides a practice section allowing anyone interested in solving the problem of innovation to learn and develop their skills
