Dynamic Perspectives on Creativity Ronald A. Beghetto, Giovanni Emanuele Corazza, 2019-01-17 This edited volume provides a venue for scholars whose work challenges the typical static conceptions and methods of studying creativity. More specifically, the book will serve as an effort to introduce more dynamic definitions, conceptions, and approaches for studying creativity in the context of educational practice. By doing so, it feeds the strong contemporary need for more dynamic conceptions of creativity in educational settings. This is particularly important given the fast evolution of modern society and the widespread consensus that efforts to develop creative potential should be democratized, extending well beyond the boundaries of the gifted subset and the walls of the classroom. This work recognizes that more dynamic perspectives on creativity are necessary for understanding its complexity, value, and meaning in educational contexts.

Creativity Under Duress in Education? Carol A. Mullen, 2018-11-09 *Creativity Under Duress in Education* introduces a new framework: creativity under duress in education. Leading creativity researchers and educational scholars discuss creative theory and practice from an educational lens that is provocative. Across international contexts, this book combines insights from creativity and educational research, rich illustrations from classrooms, schools, and other professional settings, and practical ideas and strategies for how anyone invested in education can support creative teaching and learning. Readers will encounter diverse perspectives from an international cast of authors exploring cutting-edge ideas for creativity and innovation as a foremost priority for economies in the new millennium. At the same time, they consider forces of authority, control, and constraint that impact creative education and innovation within educational systems, extending to the professions. Educators and those interested in the future of education are vitally important to this conversation around research-based and practical analyses of creativity in and beyond the classroom. Addressed are these major issues: 1. creativity frameworks of theory and action in education; 2. research investigations into creativity and education; and 3. applications of creativity theory in real-world practice. **Dynamic** this book

Alessandro Antonietti,2014-05-14 Creativity is a topic that has gained increasing interest over the past decades and unlike other topics which have sudden moments of glory and then quickly become neglected it is an issue that continues to attract the attention of researchers and practitioners overcoming the fluctuating fashions and curiosity of the moment For this reason it can be useful to consider periodically what is new about creativity The aim of this book is to discuss recent developments in the field of creativity More precisely attention has been paid to four aspects Firstly the concept of creativity changes as a consequence of transformations in the social and cultural environment Thus the way creativity is meant needs to be always updated by referring it to new requests and goals Secondly new theoretical constructs are proposed or unsuspected links between creativity and other notions are explored so as to revise the old concepts Thirdly new research methods and instruments are devised and investigators have new opportunities to shed light on further aspects of creativity Finally both researchers and professionals discover new fields where creativity can be cultivated and trained broadening the range of possible applications A variety of subjects are addressed by following different approaches and by considering different aspects of creativity Hopefully this should allow readers to have an updated view of what is currently debated and investigated in the field of theory and research about the psychological processes involved in creativity
