## **Crime Policing And Place:**

*Crime, Policing and Place* David Evans, Nicholas Fyfe, David Herbert, 2002-01-31 First published in 2002 Spiralling crime rates and continuing public concern about police community relations ensure that crime and policing remain firmly on the social and political agenda An awareness of crime continues to affect the lives of ordinary people and also to stimulate policy makers who recognise that crime rates form one of the principles by which their effectiveness is judged Of the many agencies involved in the battle against crime the police in their various roles constitute the most obvious front line Drawing on case material from Britain Europe Canada and America *Crime Policing and Place* examines the significance of spatial patterns of crime and the processes which produce them The book analyses the implications of theoretical and methodological innovation in the study of crime and policing the processes which underlie the uneven distribution and impact of crime and the success of recent policies aimed at preventing crime and enhancing police community relations Contributors are drawn from a variety of academic disciplines including criminology geography and social policy and also from the police and government agencies with direct policy input

*Policing Problem Places* Anthony Allan Braga, David Weisburd, 2010 In recent years crime scholars and practitioners have pointed to the potential benefits of focusing crime prevention efforts on crime places A number of studies suggest that crime is not spread evenly across city landscapes Rather there is significant clustering of crime in small places or hot spots that generate a vastly disproportionate number of criminal events Even within the most crime ridden neighborhoods crime clusters at a few discrete locations and other areas are relatively crime free A number of researchers have argued that many crime problems can be addressed more efficiently if police officers focus their attention on these deviant places The appeal of focusing limited resources on a small number of high activity crime places is straightforward If crime can be prevented at these problem places then police will be well positioned to lower citywide crime rates In *Policing Problem Places* Anthony A Braga and David L Weisburd make the case that hotspots policing is an effective approach to crime prevention that should be engaged by police departments in the United States and other countries There is a strong and growing body of rigorous scientific evidence that the police can control crime hot spots without simply displacing crime problems to other places Indeed putting police officers in high crime locations is an old and well established idea However the age and popularity of this idea does not necessarily mean that it is being done properly Police officers should strive to use problem oriented policing and situational crime prevention techniques to address the place dynamics situations and characteristics that cause a spot to be hot Braga and Weisburd further suggest that the strategies used to police problem places can have more or less desirable effects on police community relations Particularly in minority neighborhoods where residents have long suffered from elevated crime problems and historically poor police service police officers should make an effort to develop positive and collaborative relationships with residents and not engage strategies that will undermine the legitimacy of police agencies such as indiscriminant enforcement tactics This book argues that it is

time for police departments to shift away from a focus on catching criminal offenders and move towards dealing with crime at problem places as a central crime prevention strategy **Policing Problem Places** Anthony A. Braga, David L. Weisburd, 2010-08-05 Both those who study crime and those who fight it agree that crime is not spread evenly across city landscapes Rather clusters of crime a few hot spots host a vastly disproportionate amount of criminal activity Even within the most crime ridden neighborhoods crime concentrates at a few locations while other areas remain relatively crime free In **Policing Problem Places** Anthony Braga and David Weisburd draw on rigorous scientific evidence to make the case that hot spots policing dealing with crime at problem places instead of catching criminal offenders is an effective approach to crime prevention and that it should be engaged by police departments in the United States and elsewhere **Understanding Crime and Place** Elizabeth R. Groff, Cory P. Haberman, 2023-03-24 This book instructs students and scholars in foundational methods measurements theories and standard practices in the study of preventing and predicting crime through geographies and place based research methodologies The chapters by leading experts include exercises and walkthroughs **Managing and Leading Today's Police** Kenneth J. Peak, Larry K. Gaines, Ronald W. Glensor, 2025-07-04 For those aspiring to leadership roles in law enforcement **Managing and Leading Today's Police Challenges Best Practices Case Studies** provides practical insights and addresses real world challenges shaping today's policing landscape Drawing on their extensive experience authors Kenneth John Peak Larry Gaines and Ronald W Glensor guide future leaders in critically analyzing current issues and developing essential career skills The Fifth Edition introduces a case study at the end of each chapter complemented by new Focus On and You Decide exercises as well as sections on the use of artificial intelligence AI allowing students to engage with contemporary issues and technologies in the evolving culture of policing today **The Future of Criminology** Rolf Loeber, Brandon C. Welsh, 2012-05-01 Criminology is a dynamic and evolving field of study In recent decades the study of the causes development prevention and treatment of juvenile delinquency and adult crime has produced many important discoveries This volume addresses two questions about crucial topics facing criminology from causation to prevention to public policy Where are we now What does the future hold Rolf Loeber and Brandon C Welsh lead a team of more than forty top scholars from across the world to present the future of research policy and practice in the discipline **Applied Police Research** Ella Cockbain, Johannes Knutsson, 2014-09-15 Remarkably little has been written about the theory and practice of applied police research despite growing demand for evidence in crime prevention Designed to fill this gap this book offers a valuable new resource It contains a carefully curated selection of contributions from some of the world's leading applied police researchers Together the authors have almost 300 years of relevant experience across three continents The volume contains both practical everyday advice and calls for more fundamental change in how police research is created consumed and applied It covers diverse topics including the art of effective collaborations the interaction between policing academia and policy the interplay between theory and practice and managing ethical dilemmas This book will interest a broad and

international audience from academics and students to police management officers and trainees to policymakers and research funders *Unraveling the Crime-Place Connection, Volume 22* David Weisburd, John E. Eck, 2017-11-22 *Unraveling the Crime Place Connection* examines in a new light how places enhance our understanding of crime and its control While there has been much work in this area focused on policy few have examined the underlying theories that inform this work Theory has played a secondary role in the criminology of place and this volume brings it to the forefront of scholarly concerns Each part and its chapters illuminate cutting edge ideas in the etiology and control of crime at place beginning with an introductory Part I Crime is often concentrated in very small geographies and Part II emphasizes the importance of capturing the dynamic nature of places in order to understand crime clustering Part III offers integrative theories on the varying contextual arrangements of places and links theories of places to other theories of individuals neighborhoods and other social contexts In Part IV theorists ask how the actions of place owners facilitate or control crime and what policies governments can institute to regulate place management This volume will be of interest to criminologists worldwide and useful for graduate level or advanced undergraduate courses on environmental criminology or crime prevention Report on the State of Crime and the Police Establishment of the City of Edinburgh Edinburgh (Scotland).
