The Politics of Controlling Organized Crime in Greater China Sonny Shiu-Hing Lo,2015-12-14 In China the central government has the political will to control organized crime which is seen as a national security threat The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments The development of prostitution underground gambling and narcotics production has become so serious that the central government has to rely on anti crime campaigns to combat these three evils This book explores the specific role of government institutions and agencies notably the police in controlling organised and cross border crime in Greater China Drawing heavily on original empirical data it compares the both the states of the People s Republic of China and Taiwan as well as city states Hong Kong and Macao This region has become increasingly economically integrated and human interactions have been enhanced through improved trade relations tourism and increased individual freedom The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti crime campaigns It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political criminal nexus Focusing on regime capacity in crime control regime autonomy from crime groups and regime legitimacy in the fight against organized crime this thought provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly

Industry ,1895 *Impact of Organized Crime on Murder of Law Enforcement Personnel at the U.S.-Mexican Border* Sara Schatz,2014-07-14 This brief fills a gap in the studies of organized crime in Mexico Kan 2012 R os 2011 Dell 2011 by documenting and mapping the post 2008 assassination of Mexican border police chiefs It traces out a systematic of law enforcement assassination in Northern Tier Mexico showing how the selective often sequential hits by cartels on chiefs in border towns and along key drug trafficking corridors has proven an effective strategy by organized

crime elements to serve several goals 1 to retaliate for federal state and local prosecution 2 to try and neutralize police chiefs 3 to achieve intermittent local governance and or to seed corrupt police chiefs at the municipal level and 4 to reduce local governmental capacity to obtain greater freedom for movement of goods It is argued that the tactical advantage of organized crime elements gives them relatively easy physical access to law enforcement targets and thus is thus one prime element facilitating the use of assassination as a strategy U S and Mexican legal political and judicial institutions have not been able to adequately restrict opportunity for law enforcement assassinations The inability to reduce access to weapons and officials to increase security for police personnel to reduce corruption and punish offenders sets the stage for the assassination of local law enforcement Yet it is the goals of organized crime elements to clear drug smuggling routes and to try and gain more pliant governance at the municipal level that ultimately motivate such killings Criminal Justice in Cleveland Cleveland Foundation,1922
