Collective Action In East Asia:

Collective Action in East Asia Gregory W. Noble, 2018-09-05 As one Asian economic crisis follows another sending shock waves through the global market questions about the making and conduct of industrial policy in the East take on a special urgency Observers are sharply divided as to whether the ubiquitous attempts at cooperation among competing firms in Asia have been a key to competitiveness or a corrosive form of collusion This timely book offers a close look at the impact of industrial policies on collective action in East Asia in Japan and Taiwan and more briefly in South Korea Systematically comparative and based on interviews and original research in the local languages it focuses on forms of collective action such as cartels standardization and research and development consortia in the consumer electronics and minimill steel industries The book combines detailed case studies with analyses of the political bureaucratic and industrial environments in which policy is crafted It also considers how these environments have evolved in the past decade as long ruling conservative parties have been challenged in all three countries Among the book's findings is a surprising disparity between the ways in which Japan and Taiwan have handled collective action policy despite their many historical demographic and economic similarities *Collective Action in East Asia* also brings to light unexpected inconsistencies in the effectiveness of Japanese policy which frequently succeeds with R D consortia but struggles with cartels Studying both the rapid growth period of the 1980s and the more recent economic slowdown in East Asia this book provides crucial information for an understanding of today's global economy

The Korean Journal of International Studies ,1992 **Before a Democracy Died** Scott Leckie, José María Arraiza, 2023-11-22 This volume is a collection of chapters based on work within Myanmar by the authors between 2009 and 2021 while working to improve housing land and property rights for the population Despite the extensive application and political uptake of their work throughout the country during the brief democratic reform period of 2011 2021 and measurable progress being made their work and that of the entire HLP community was brought to a sudden stop following the unexpected military coup in February 2021 Many of those with whom the authors worked closely on various HLP matters are no longer able to work safely on these issues in Myanmar Others have fled the country and are now refugees while others continue to face daily persecution and harassment by the military regime These texts will be of great interest to scholars and activists in the region

The Global Environment in the Twenty-first Century Pamela S. Chasek, 2000 This volume examines the roles of different actors in the formulation of international and national environmental policy It starts from the premise that while cooperation among nation states has proven to be necessary to address many transboundary environmental issues virtually all policies must be implemented at the national or local level The growing interaction between national and international actors and levels of governance is an increasingly important aspect of international environmental policy The authors examine the roles of state and non state actors in safeguarding the environment and advancing sustainable development into the twenty first century Each of the five sections focuses on a different actor states civil society market forces regional arrangements and international organizations By examining the functions and capabilities of each of these actors the authors analyse their effectiveness and their relationship with other actors both within and outside of the UN system providing a useful framework for understanding the multi actor multi issue nature of international environmental policy *Transactions of the Asiatic Society of Japan* Asiatic Society of Japan, 2010 List of transactions v 1 41 in v 41

Economic and Political Change in Asia and Europe Bernadette Andreosso-O'Callaghan, Frédéric Royall, 2012-08-10 Since the 1973 publication of Alain Peyrefitte's prophetic *When China Awakens* developments in East Asia have outstripped even the wildest predictions China has undergone the fastest industrialization and urbanization process in history yet tensions there are rising as some realize how far they have been left behind This volume explores the applicability of European economic and social models to our analysis of East Asia's and in particular China's situation Though millions of Chinese and other Asian people have been lifted out of poverty inequality is rising nonetheless and contemporary Europe and Asia are both witnessing collective action against rampant economic neoliberalism in the former and the exclusion of minorities in the latter It is difficult to overstate the relevance of this assessment which seeks answers to some central questions Can events in Europe serve as a model for those in East Asia Are there similarities or differences between the two regions To what extent do political economic or social systems stimulate or inhibit collective action How culturally equivalent are the collective actions of marginalized

disadvantaged people in the two locations or are events in Europe symptomatic of specific cultural attributes Comparing and contrasting the research tools and dominant paradigms in the social and economic sciences in East Asia and Europe as this volume does throws out some revealing results

East Asian Social Movements Jeffrey Broadbent, Vicky Brockman, 2011-01-07 In the study of civil society and social movements most cases are based in Western Europe and North America These two areas of the world have similar histories and political ideals and structures in common which in turn affect the structure of its civil society In studying civil society in Asia a different understanding of history politics and society is needed The region's long traditions of centralized authoritarian states buttressed by Confucian and in some cases Communist ideologies may render this concept irrelevant The chapters in this international volume cover most of the areas and countries traditionally defined as belonging to East Asia Japan Taiwan South Korea Hong Kong Singapore and China The case studies included in this volume confront the utility of using the Western concept of civil society represented in its most active form social movements to think about East Asia popular politics Along with providing an array of important case studies of social movements in East Asia the introduction chapters and conclusion in the book take up three major theoretical questions the effect of the East Asian cultural social and institutional context upon the mobilization activities and outcomes of social movements in that region the role of social movements in larger transformative processes utility of Western social movement concepts in explaining social movements in East Asia This book will be of interest to two major groups of readers those who study East Asia and those who pursue social movements and civil society as well as politics more generally
