Colliding Worlds Arthur I. Miller, 2014-06-09 A dazzling look at the artists working on the frontiers of science In recent decades an exciting new art movement has emerged in which artists utilize and illuminate the latest advances in science Some of their provocative creations a live rabbit implanted with the fluorescent gene of a jellyfish a gigantic glass and chrome sculpture of the Big Bang pictured on the cover can be seen in traditional art museums and magazines while others are being made by leading designers at Pixar Google s Creative Lab and the MIT Media Lab In Colliding Worlds Arthur I Miller takes readers on a wild journey to explore this new frontier Miller the author of *Einstein Picasso* and other celebrated books on science and creativity traces the movement from its seeds a century ago when Einstein s theory of relativity helped shape the thinking of the Cubists to its flowering today Through interviews with innovative thinkers and artists across disciplines Miller shows with verve and clarity how discoveries in biotechnology cosmology quantum physics and beyond are animating the work of designers like Neri Oxman musicians like David Toop and the artists in residence at CERN s Large Hadron Collider From NanoArt to Big Data Miller reveals the extraordinary possibilities when art and science collide

Between Colliding Worlds Jonathan Malloy, Institute of Public Administration of Canada, 2003-01-01 Jonathan Malloy s *Between Colliding Worlds* examines the relationship between governments and external activists through a comparative study of policy units dedicated to aboriginal and women s issues in Australia and Canada Malloy identifies these units or special policy agencies as sitting on the boundary between the world of permanent public servants and that of collective social movements working for broad social and political change These agencies at once represent the interests of social movements to government while simultaneously managing relations with social movements on behalf of government and thus operate in a state of permanent ambiguity Malloy contends that rather than criticizing these agencies for their inherently contradictory nature we must reconsider them as effectively dealing with the delicate issue of bridging social movements with state politics In other words the very existence of these special policy agencies provides a forum for social movements and the state to work out their differences Relying heavily on interviews with public servants and external activists Malloy argues convincingly that special policy agencies despite or because of their ambiguous relationship to different communities make critical contributions to governance
