## Collecting Old Maps:

*Collecting Old Maps* Francis J. Manasek, 2015      **Collecting Old Maps** Francis J. Manasek, Marti Griggs, Curt Griggs, 2015-02-15 The highly anticipated second edition of *Collecting Old Maps* is completely revised and expanded with over 400 color illustrations. While maintaining the original approach to the nuts and bolts of map collecting, there is new information on collecting in the digital age, building and disposing of a collection, papermaking history, and the mythological figures, symbols, and allegory used in cartography. The most significant change to this new edition is the Map Gallery, which is more comprehensive and profusely illustrated in full color. Nearly 200 maps were assembled to illustrate the five-century evolution of printed maps and how they changed both artistically and technically in response to various cultural and market influences. They illustrate the progression from the simple woodcuts of the incunabula period to the elegant copperplate engravings of Renaissance Italy, then to the Baroque Dutch compositions, the refined style of scientific cartographers, and finally the technically advanced but sometimes whimsical approach of 20th-century mapmakers. These maps represent a broad range of geographic regions, cartographic importance, and prices. Rather than focusing on the rare and obscure, these are maps that can be collected today.

**Antique Maps** Carl Moreland, David Bannister, 1994-01-01 A standard reference work and collector's guide to old maps, *Antique Maps* is now firmly established as a definitive reference work. With extensive information on the general historical background, details of all the major mapmakers, and practical advice on collecting old maps, it provides an excellent introduction for the beginner as well as a mass of precise and clearly organized information for the expert and the serious collector. A beautiful edition in itself, this timeless volume evokes the elegance of maps from the past and the charm of all the distant places they suggest to show them not only as historical artefacts but also as works of art.

*The Story of Xinjiang Revealed through Old Maps (1759-1912)* Wang Yao, 2021-08-18 Xinjiang, named in 1759 by Emperor Qianlong (1711-1799) of the Manchu-led Qing dynasty of China, was ruled by the Qing from the final phase of the Dzungar-Qing Wars when the Dzungar Khanate was conquered and lasted until the fall of the imperial dynasty in 1912. Based on rare ancient maps and historical archives, the book tells stories of Xinjiang during the Qing. It involves Emperor Qianlong's concubine Xiangfei, Uyghur concubine married with Emperor Qianlong, Lady Catherine, the wife of the British consul general in Kashgar at the end of the 19th century, and lived in Xinjiang for nearly two decades. Swedish missionaries persisted in spreading Christianity for 38 years among Uyghurs who believed in Islam. Guan Gong temples, the belief in Lord Guan, a religious tradition of the Han and Manchus, and so on.

**The History of Cartography, Volume 6** Mark Monmonier, 2015-05-18 For more than thirty years, the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, *Cartography in the Twentieth Century*, continues this tradition with a groundbreaking survey of the century just ended and a new full-color encyclopedic format. The twentieth century is a pivotal period in map history. The transition from

paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps

Mapping the Nation Susan Schulten, 2012-06-29 A compelling read that reveals how maps became informational tools charting everything from epidemics to slavery Journal of American History In the nineteenth century Americans began to use maps in radically new ways For the first time medical men mapped diseases to understand and prevent epidemics natural scientists mapped climate and rainfall to uncover weather patterns educators mapped the past to foster national loyalty among students and Northerners mapped slavery to assess the power of the South After the Civil War federal agencies embraced statistical and thematic mapping in order to profile the ethnic racial economic moral and physical attributes of a reunified nation By the end of the century Congress had authorized a national archive of maps an explicit recognition that old maps were not relics to be discarded but unique records of the nation's past All of these experiments involved the realization that maps were not just illustrations of data but visual tools that were uniquely equipped to convey complex ideas and information In Mapping the Nation Susan Schulten charts how maps of epidemic disease slavery census statistics the environment and the past demonstrated the analytical potential of cartography and in the process transformed the very meaning of a map Today statistical and thematic maps are so ubiquitous that we take for granted that data will be arranged cartographically Whether for urban planning public health marketing or political strategy maps have become everyday tools of social organization governance and economics The world we inhabit saturated with maps and graphic information grew out of this sea change in spatial thought and representation in the nineteenth century when Americans learned to see themselves and their nation in new dimensions
