## **Collective Remembering:**

*Voices of Collective Remembering* James V. Wertsch, 2002-07-15 There is currently a great deal of discussion in the humanities and social sciences about collective memory but there is very little agreement on what it is The first goal of this volume is to review various understandings of this term to bring some coherence to the discussion Drawing on this review James V Wertsch goes on to outline a particular version of collective remembering grounded in the use of textual resources especially narratives This takes him into the special properties of narrative that shape this process and into the issues of how these textual resources are produced and consumed Wertsch brings these general ideas to life by examining the rapid massive transformation of collective memory during the transition from Soviet to post Soviet Russia

*Collective Remembering* David J. Middleton, David Middleton, Derek Edwards, 1990-04 Profoundly challenging the traditional view of memory as the product and property of individual minds Collective Remembering is concerned with remembering and forgetting as socially constituted activities The starting point is a conceptualization of remembering and forgetting as forms of social action Individual memories cannot be understood as internal mental processes which occur independently of the interpretive and communicative practices which characterize a particular society or culture Individuals read account for and negotiate their memories within the pragmatics of social life Contributions also explore the collective processes through which communities social memories are created sustained and transformed

**Collective Remembering** Ludmila Isurin, 2017 This interdisciplinary study explores collective memory as it is presented by official producers such as textbooks and media and reflected by consumers group members Focusing on a case study of Russians and Russian immigrants to the USA and their memories of seminal events in the twentieth century Russian collective past Isurin shows how autobiographical memory contributes to the formation of collective memory and also examines how the memory of the shared past is reconstructed by those who stayed with the group and those who left By bringing together historical anthropological and psychological approaches Collective Remembering provides a new theoretical framework for memory studies that incorporates both content analysis of texts and empirical data from human participants thus demonstrating that methodologies from the humanities and the social sciences can complement each other to create a better understanding of how memory works in the world and in the mind

**Discursive Remembering** Lucas M. Bietti, 2014-10-14 This book aims at building a bridge between the social and political aspects of remembering and the cognitive and discourse processes driving such activities By analyzing these cognitive and discursive processes Bietti explores practices of individual and collective remembering in institutional and private settings in relation to periods of political violence in Argentina This book begins to fill the conceptual gap between cognitive oriented approaches to remembering that draw conclusions about how memory functions in the mind without a detailed discourse analysis of the communicative interaction in which this process unfolds and the discourse and pragmatic oriented approaches that are mainly interested in analyzing the rhetorical features

of conversational remembering in some cases disregarding that there are underlying cognitive mechanisms that drive the construction of discourses about past experiences The empirical analysis shows that individual and collective remembering in relation to periods of political violence in Argentina vary in pragmatic ways due to the fact that these accounts of the past were constructed with reference to the communicative situation Thus this book also aims at shedding new light on the current practices of commemoration and remembrance related to periods of political violence in Argentina in public and private settings

*Memory in Mind and Culture* Pascal Boyer, James V. Wertsch, 2009-06-08 This text introduces students scholars and interested educated readers to the issues of human memory broadly considered encompassing both individual memory collective remembering by societies and the construction of history The book is organised around several major questions How do memories construct our past How do we build shared collective memories How does memory shape history This volume presents a special perspective emphasising the role of memory processes in the construction of self identity of shared cultural norms and concepts and of historical awareness Although the results are fairly new and the techniques suitably modern the vision itself is of course related to the work of such precursors as Frederic Bartlett and Aleksandr Luria who in very different ways represent the starting point of a serious psychology of human culture

*Intersections of Law and Memory* Mirosław Michał Sadowski, 2024-03-12 This book elaborates a new framework for considering and understanding the relationship between law and memory How can law influence collective memory What are the mechanisms law employs to influence social perceptions of the past And how successful is law in its attempts to rewrite narratives about the past As the field of memory studies has grown this book takes a step back from established transitional justice narratives returning to the core sociological philosophical and legal theoretical issues that underpin this field The book then goes on to propose a new approach to the relationship between law and collective memory based on a conception of legal institutions of memory It then elaborates the functioning of such institutions through a range of examples taken from Japan Iraq Brazil Portugal Rwanda and Poland that move from the work of international tribunals and truth commissions to more explicit memory legislation The book concludes with a general assessment of the contemporary intersections of law and memory and their legal institutionalisation This book will be of interest to scholars with relevant interests in the sociology of law legal theory and international law as well as in sociology and politics
